Conference Venue Floor Map
5th & 7th August, Hotel Nikko, Fukuoka

Hakata Station to Hotel Nikko (about 3 min. walk).

Floor Map: 3rd Floor, Hotel Nikko Fukuoka

Floor Map: 5th Floor, Hotel Nikko Fukuoka
6th August, Kyushu Sangyo University, Fukuoka

Public Transportation: Hakata Station or Tenjin to/from Kyushu Sangyo University

(a) By Train (from Hakata Station along JR Kagoshima Line)

Take notes:

(a) By Train (from Hakata Station along JR Kagoshima Line)

- (1) Take the Local/Ordinary (普通: Futsu) JR trains from Hakata Station to/from “Kyusandai-Mae” Station. Rapid (快速: Kaisoku) trains or Regional Rapid (区間快速: Kukan-Kaisoku) trains do not stop at “Kyusandai-Mae” Station. If you take the Rapid or Regional Rapid Train, you must change train at “Kashii” Station. On the average, Ordinary Trains run every 15-20 minutes, and its only about 15 minutes train ride from “Hakata” Station to “Kyusandai-Mae” Station.

- (2) The train fare from Hakata Station to/from Kyusandai-Mae Station is JPY270.

(b) By Bus (from Tenjin Yubinkyoku Mae Bus Stop)

- If you are staying somewhere in Tenjin area, you can take the:

  - (1) Highway Bus from “Tenjin Nishigam-e” Bus Stop and get-off at “Kyushu Sangyo Daigaku Minamiguchi” Bus Stop (Fare: JPY 420). This bus takes the route via the Fukuoka Urban Expressway.

  - (2) Local Bus from “Tenjin Chuo Yubinkyoku-mae” Bus Stop and get-off at “Kyushu Sangyo Daigaku-mae” Bus Stop (Fare: JPY 420). This bus stops at every bus stop along the way.

(c) By Taxi (from Hakata Station)

- The taxi fare will be about JPY3,500 or so (depending on the time of the day).
Day 2: August 6 (Tue)
Walking directions to the conference venue from JR Kyusyu SanDai Mae Station, or Nishitetsu Bus Stops

2019 CyberSciTech/DASC/PlCom/CBDCom Program Preview

Keynotes

**Keynote I:** Isao Echizen, Deputy Director General / Professor, National Institute of Informatics (NII), Japan
Protection and Use of Biometric Identity Information - New Possibilities for Media Security and Privacy

**Keynote II:** Frank Hsu, Clavius Distinguished Professor / Director of Laboratory of Informatics and Data Mining, Fordham University, USA
Ranking and Scoring for Data Analytics and Combinatorial Fusion

**Keynote III:** Liming (Luke) Chen, Professor, De Montfort University, UK
Computational Behaviour Analysis for Cyber-Physical Systems within Smart World

**Keynote IV:** Cesare Pautasso, Professor, University of Lugano (USI), Switzerland
On Liquid Software and the Programmable World

**Keynote V:** Yuanshun Dai, Dean of School of Cybersecurity / Professor, University of Electronic Science and Technology of China, China
Autonomic Computing for Self-improving Dependability in Large-Scale Computing System

Joint Panel on the Future Direction of Cybersecurity Research

Panel Chair:
- **Koji Nakao**, Distinguished Researcher, NICT, Japan & Cybersecurity Advisor, National Center of Incident Readiness and Strategy for Cybersecurity, Cabinet Secretariat of Japan

Panelists:
- **Stephen S. Yau**, Professor, Arizona State University, USA & the Life Fellow of IEEE
- **Michael David**, Professor, The National Intelligence University, USA
- **Zhong Chen**, Professor, Peking University, China
- **Masato Terada**, Professor, Tokyo Denki University, Japan

CyberSciTech 2019 Sessions

- **CyberSciTech Session 1:** Cyber Physical Computing & Systems
- **CyberSciTech Session 2:** Cyberspace & Cyber Security I
- **CyberSciTech Session 3:** Cyber Social Computing & Networks
- **CyberSciTech Session 4:** Cyber Intelligence, Life & Mind I
- **CyberSciTech Session 5:** Cyber Intelligence, Life & Mind II
- **CyberSciTech Session 6:** Cyberspace & Cyber Security II
- **CyberSciTech WiP Session 1:** Cyber Security, Privacy & Trust 1
- **CyberSciTech WiP Session 2:** Cyber Security, Privacy & Trust 2
- **CyberSciTech WiP Session 3:** Cyberspace Theory & Technology
- **CyberSciTech WiP Session 4:** Cyber Physical Computing & Systems
- **CyberSciTech WiP Session 5:** Cyber Intelligence & Cognitive Science
- **CyberSciTech Poster Paper Session**

CyberSciTech 2019 Workshops and Special Sessions

- **HISSD:** The 2nd International Workshop on Healthcare with Intelligent Sensing, System, and Data
- **BCSec:** The 1st International Workshop on Big Data Analytics for Cyber Security and Defence
- **Cyber-IoT:** Special Session on Computing and Applications for Cyber Internet of Things
CSC&CEA: Special Session on Cyber Social Computing and Cyber-Enabled Applications  
CSSI: Special Session on Cyber System Security and Intelligence  
IoTonFEC: Special Session on the Impact of Internet of Things on the Future Elderly Care

DASC 2019 Sessions
- DASC Session 1: Dependability and Security for Hardware, Software and Data  
- DASC Session 2: Emerging Applications of Secure and Dependable Computing  
- DASC WiP Session  
- DASC Poster Paper Session

DASC 2019 Workshops
- ADSN: The 18th International Workshop on Assurance in Distributed Systems and Networks  
- DeIS: The 1st International Workshop on Dependable Intelligent Systems

PICom 2019 Sessions
- PICom Session 1: Computational Intelligence  
- PICom Session 2: Activity Recognition and Ubiquitous Systems  
- PICom Session 3: Intelligent Middleware and Applications  
- PICom Session 4: Pervasive and Embedded Computing  
- PICom Poster Paper Session

PICom 2019 Workshops
- IPIA: The 1st International Workshop on Intelligence Big Data Processing Infrastructure and Its Applications  
- IWSSC: The 3rd International Workshop on Secure and Sustainable Computing and Communication Technologies for Smart Communities

CBDCom 2019 Sessions
- CBDCom Session 1: Analytics Theorem, Systems & Tools  
- CBDCom Session 2: Big Data Intelligence & Applications  
- CBDCom Session 3: Big Data Analysis & Applications  
- CBDCom WiP Session

Presentation Guidelines
1) Regular Paper: 20 min = 15 min Presentation+5 min Q&A.  
2) Work-in-Progress, Workshop & Special Session Papers: 15 min = 12 min Presentation + 3 min Q&A.  
3) Posters: One A1-size poster (594mm x 841mm) stand (portrait style) will be provided for each presenter. Please report to the registration desk with your poster before 9:30am, 6th Aug.
Cyberspace is paving the way towards a cyber world and its conjugations with existing physical, social and mental worlds. Cyberization is the process for integrating novel cyber entities with numerous entities in conventional worlds with a suite of cyber theories and techniques covering cyberspace, cybersecurity, cyber physics, cyber sociology, cyber intelligence, cyber life, etc. Cyber science and technology are highly in demand in response to an ever-increasing diversity of innovative cyber entities and cyber-enabled new worlds.

IEEE Cyber Science and Technology Congress, CyberSciTech in short, has been aimed at providing a common platform for scientists, researchers, and engineers to share their latest studies and advances in the broad scope of cyber-related science, technology, and application topics. IEEE CyberSciTech has been successfully held in Auckland, New Zealand, in 2016, in Orlando, USA, in 2017 and in Athens, Greece, in 2018. We are very pleased for CyberSciTech 2019 to be held in Fukuoka, Japan, together with the 17th IEEE International Conference on Dependable, Autonomic and Secure Computing (DASC 2019), the 17th IEEE International Conference on Pervasive Intelligence and Computing (PICom 2019), and the 5th IEEE International Conference on Cloud and Big Data Computing (CBDCom 2019).

The great success of IEEE CyberSciTech/DASC/PICom/CBDCom 2019 is contributed by the awesome organizing work done by many people. We are grateful for the leadership of CyberSciTech 2019 general chairs Bernady O. Apduhan, Kouichi Sakurai and Kevin I-Kai Wang, DASC 2019 general chairs Tadashi Dohi and Md Zakirul Alam Bhuiyan, PICom 2019 general chairs Flavia C. Delicato and Sozo Inoue, and CBDCom 2019 general chairs Anna Kobusinska and Peng Li for establishing strong and active organizing teams and effectively coordinating the team work. We highly appreciate congress/conference honorary chairs Norio Shiratori, Hideyuki Tokuda, Nobuyasu Kanekawa and Frank Hsu as well as advisory committee chairs and members for their advice and kind support to IEEE CybSciTech/DASC/PICom/CBDCom 2019. We express our great gratitude to all program chairs, program co-chairs and track chairs, workshop/special session chairs, publicity chairs and other chairs for their hard and excellent work.

We are honored for distinguished researchers Isao Echizen, Frank Hsu, Liming Chen, Cesare Pautasso and Yuanshun Dai to deliver their inspiring keynote speeches. We also appreciate panel chair Koji Nakao and panelists Stephen S. Yau, Michael David, Zhong Chen and Masato Terada for sharing their insights about the future direction on cybersecurity research. We would like to express our special thanks to local organizing team members and volunteers who have done a tremendous work to offer us wonderful services. Our sincere gratitude also goes to all authors who have submitted their high-quality papers to our conferences and all program committee members for their professional work in reviewing papers.

Wish you an enjoyable participation in IEEE CyberSciTech/DASC/PICom/CBDCom 2019 and a nice stay in Fukuoka, one of the major cities in Japan, with delicious foods and culture attractions.
Message from CyberSciTech 2019
General Chairs, General Executive Chairs and Program Chairs

Over the past decade, Cyber technologies are developing at a tremendous rate and becoming an inseparable part of our day to day lives. Challenges across Cyber technologies, ethics, and other traditional disciplines are also emerging. The future of Cyber Science and Technology will be of transdisciplinary nature that requires careful study, investigation, and discussion. The aim of CyberSciTech Congress is to address the broad challenges in Cyber Science and Technology and to offer a common platform for our fellow scientists, engineers, industrial practitioners, and researchers to present and exchange their latest ideas, discoveries, and implementations. Therefore, it is our great honor and pleasure to welcome all our participants to the 2019 Cyber Science and Technology Congress (CyberSciTech 2019) held in Fukuoka, Japan on 5-8 August, 2019. CyberSciTech 2019 is sponsored by the IEEE Computer Society. It is co-located with the 17th IEEE International Conference on Dependable, Autonomic & Secure Computing (DASC 2019), the 17th IEEE International Conference on Pervasive Intelligence and Computing (PICom 2019), and the 5th IEEE International Conference on Cloud and Big Data Computing (CBDCom 2019).

To address the comprehensive nature and emerging challenges of Cyberization, CyberSciTech 2019 offers six technical tracks on the topics of

- Track 1: Cyberspace Theory & Technology
- Track 2: Cyber Security, Privacy & Trust
- Track 3: Cyber Physical Computing & Systems
- Track 4: Cyber Social Computing & Networks
- Track 5: Cyber Intelligence & Cognitive Science
- Track 6: Cyber Life & Wellbeing

In addition, seven special sessions/workshops on the topics of

1. Workshop on Healthcare with Intelligent Sensing, System, and Data (HISSD),
2. Workshop on Big Data Analytics for Cyber Security and Defence (BCSec),
3. Workshop on Emerging Dependable Computing System Technologies and Applications (EDCSTA),
4. Special Session on Cyber Social Computing and Cyber-Enabled Applications (CSC&CEA),
5. Special Session on Computing and Applications for Cyber Internet of Things (Cyber-IoT),
6. Special Session on the Impact of Internet of Things on the Future Elderly Care (IoTonFEC),
7. Special Session on Cyber System Security and Intelligence (CSSI)

are jointly organized. Overall, CyberSciTech 2019 received 130 submissions covering a wide range of topics. Finally, 30 high quality regular papers, 24 Work-in-Progress papers, 4 poster papers are included in the 2019 Proceedings. Another 34 papers are accepted in the special sessions/workshops. All accepted papers are selected based on a rigorous peer review process.

It is our great pleasure to find and assemble a great organizing committee, which is the key to a successful event. We would like to take this chance to thank the entire organizing and steering committee, especially the Steering Committee Prof. Jianhua Ma (Chair), Prof. Qun Jin, Prof. Laurence Yang and Prof. Hui-Huang Hsu for their guidance; the General Chairs Prof. Bernady O. Apduhan, Prof. Kouichi Sakurai, and Dr. Kevin I-Kai Wang, for their dedicated hard work. We would like to present our gratitude to our General Executive Chairs Fuhua (Oscar) Lin and Prof. Keichi Iwamura for their continuous support. Special thanks must go to our Program Chairs Prof. Henry Leung, Prof. Kim-Kwang Raymond Choo, and Prof. Kenichi Kourai, together with our Track Chairs Prof. Katina Kralevska, Prof. Toshihiro Yamauchi, Prof. Yuji Suga, Prof. Celimuge Wu, Prof.
Weimin Li, Prof. Ali Akber Dewan, Prof. Klimis Ntalianis, and Prof. Xiaokang Zhou, for their relentless effort in promoting our conference and managing our rigorous review process. We would also like to thank our Workshop Chairs Prof. Wasim Ahmad, Prof. Zhou Su, and Prof. Young-Hoon Park in inviting and organizing many great and topical workshops and special sessions to enrich the coverage of our Congress. A successful event always rely on a great publicity team and special thanks must go to Prof. Lai Tu, Prof. Yier Jin, Prof. Syed Akhter Hossain, Prof. Maciej Huk, Prof. Chih-Chieh Hung, and Prof. Masato Oguchi.

Of course, we want to express our sincere gratitude to all authors, participants, PC members, and many others who greatly contributed to CyberSciTech 2019 in many different ways. We sincerely hope all of you find CyberSciTech 2019 stimulating and helpful to your future research work and research network building. Please enjoy your visit and stay in the Fukuoka, Japan!

Bernady O. Apduhan, Kyushu Sangyo University, Japan
Kouichi Sakurai, Kyushu University, Japan
Kevin I-Kai Wang, The University of Auckland, New Zealand
General Chairs of CyberSciTech 2019

Fuhua (Oscar) Lin, Athabasca University, Canada
Keiichi Iwamura, The Tokyo University of Science, Japan
General Executive Chairs of CyberSciTech 2019

Henry Leung, The University of Calgary, Canada
Kim-Kwang Raymond Choo, The University of Texas at San Antonio, USA
Kenichi Kourai, Kyushu Institute of Technology, Japan
Program Chairs of CyberSciTech 2019

Katina Kralevska, Norwegian University of Science and Technology, Norway
Toshihiro Yamauchi, Okayama University, Japan
Yuji Suga, Internet Initiative Japan, Japan
Celimuge Wu, The University of Electro-Communications, Japan
Weimin Li, Shanghai University, China
Ali Akber Dewan, Athabasca University, Canada
Klimis Ntalianis, University of West Attica, Greece
Xiaokang Zhou, Shiga University, Japan
Program Co-Chairs of CyberSciTech 2019
It is our great pleasure to welcome you to the 17th IEEE International Conference on Dependable, Autonomic and Secure Computing (DASC 2019), hosted in Fukuoka, Japan in August 5-8, 2019.

DASC covers important and contemporary topics related to autonomy, dependability and security concerns in large-scale, complex distributed information systems. These systems face inevitable problems of accidental/deliberate faults, malicious attacks, illegal intrusions, and natural disasters, leading consequently to limitations in the availability and reliability. As a promising means to implement dependable and secure systems, autonomic computing technology can be explored. Trusted and autonomic computing and communications require scientific and technological advances in a wide variety of fields, as well as new software, system architectures, and communication systems that support the effective and coherent integration of the constituent technologies. Hence, DASC-2019 strives to bring together computer scientists, industrial engineers, and researchers to discuss and exchange experimental and theoretical results, experience, and case studies on all aspects of autonomic, dependable, and secure computing, its applications, and to identify new research topics and trend-setting ideas.

This year, IEEE DASC-2019 is co-located with IEEE PICom, IEEE CyberSciTech, and IEEE CBDC. DASC-2019 received a good number of submissions covering a wide range of topics. Putting more emphasis on the quality, in the end, 10 full papers, 14 papers with 2 workshops, and 5 work-in-progress papers are included in the proceedings and to be presented in DASC-2019. All accepted papers are selected based on a rigorous peer review process. To encourage authors and promote the work presented at DASC, we are delighted to inform that a selection of the best papers accepted and presented at the conference will be invited for regular or special issues of reputable journals.

An international conference of this scale requires the support of many people. We would like to take this opportunity to thank all the members of the organizing committee, especially the Honorary Chairs Dr. Nobuyasu Kanekawa and Prof. Rajkumar Buyya; the Steering Chairs Prof. Jianhua Ma and Prof. Laurence Yang for their support, guidance, and their contribution to attracting high-quality papers. Thanks to all TPC members and reviewers for their valuable time and effort in reviewing the papers. We take this opportunity to thank also all the authors, participants and session chairs for their valuable efforts, many of whom need to travel long distances to attend this conference and make their valuable contributions. Thanks also go to the entire local arrangement committee members, including General Executive Chair Prof. Bernady O. Apduhan for the help in making the conference a wonderful success. Special thanks go to Dr. Kevin I-Kai Wang’s team for the support to manage the conference webpage, paper submission, and so on, which facilitated the overall process.

It was our great honor and pleasure to accept the responsibilities and challenges of Conference General and Program Chairs/Cochairs. We trust that you will enjoy the academic program within DASC-2019, and at the same time that you will be able to see some of the surrounding natural beauty of the region. We look forward to seeing you at the IEEE DASC-2019 event.

Tadashi Dohi, Hiroshima University, Japan
Md Zakirul Alam Bhuiyan, Fordham University, USA
General Chairs of DASC 2019
Tatsuhiro Tsuchiya, Osaka University, Japan
Program Chair of DASC 2019

Naohiro Hayashibara, Kyoto Sangyo University, Japan
Aniello Castiglione, University of Salerno, Italy
Zheng Zheng, Beihang University, China
Program Co-Chairs of DASC 2019
Message from PICom 2019
Program Chairs and General Chairs

It is our pleasure to welcome you all to the 17th IEEE International Conference on Pervasive Intelligent and Computing (PICom 2019). We are experiencing a moment in human history in which technological innovations occur at an unprecedented pace. Emerging technologies have the potential to change the way we live and interact among ourselves and with the environment. Computers have become ever smaller and all types of daily life objects are being instrumented with sensors and actuators able to monitor and act upon the physical environment. Beyond the ability to perceive phenomena in the real world, such objects are increasingly equipped with capabilities to process, reason over monitored data, detect and react to events, perform inferences, and generate useful knowledge, thus becoming smart objects. With the evolution of wireless technologies, these objects also become able to communicate with each other, with other real and virtual entities, and to cooperate for performing complex tasks. When an environment is broadly pervaded with smart objects, that is what we call pervasive intelligence.

Since its first edition in 2003, PICom has been established as a premier conference aiming to cover all dimensions of the intelligent paradigms as well as their applications in several pervasive computing domains. By covering the different visions and components of computational intelligence, including techniques and disciplines already well established, as well as emerging paradigms, PICom has a broad scope. PICom scope includes ubiquitous intelligence, social Intelligence, intelligent network, machine learning, big data, Internet of Things, cloud computing, context-aware computing, pervasive security, to name a few.

This year, we received many high-quality submissions from several parts of the world, which underwent a rigorous peer review process. At the end, 19 full papers and 7 posters were accepted to be presented at the main track of the conference. Besides the main track, this year PICom also includes two workshops on timely and very appealing subjects: the 1st International Workshop on Intelligence Big Data Processing Infrastructure and Its Applications and the 3rd IEEE International Workshop on Secure and Sustainable Computing and Communication Technologies for Smart Communities.

To promote the dissemination of the high-quality work presented at PICom, we are delighted to inform that a selection of the best papers will be invited for regular or special issues of four reputable journals: IEEE Access, International Journal of Computer Sciences and Engineering, Journal of Information Science and Engineering, and CCF Transactions on Pervasive Computing and Interaction.

An international conference of this scale requires the support of many people. First, we would like to thank the Steering Chairs, Prof. Jianhua Ma, Prof. Laurence T. Yang and Prof. Adnan Al-Anbuky, for nourishing the conference and wisely guiding its course. Our heartfelt thanks to our General Executive Chairs, Professors Bernady Apduhan and Rossitza Marinova, for their efforts in organizing the conference. We are also indebted to our esteemed Track Chairs for efficiently guiding the review process with the invaluable help of the members of the program committee, who have put in hard work to review each paper in a professional way. Without their help, this program would not be possible. We are very grateful to the Chairs and organizers of the workshops, for providing another excellent forum for presentation and exchange of ideas. We appreciate the valuable help of our Publicity Chairs for disseminating the calls of our conference. Special thanks go to Kevin I-Kai Wang for his tireless and masterful work in managing several bureaucratic and infrastructure issues of the co-located events. Thanks to the local arrangement committee for their help in making the conference a success. We also thank all the authors, participants and session chairs for their valuable efforts. We are also grateful to IEEE for publishing the proceedings.
The 2019 edition of PICom is held in the beautiful Fukuoka City in the island of Kyushu, Japan. With a lot of attractions, excellent food, beautiful sea and mountains, Fukuoka has been selected as the world's most livable cities every year. We hope that participants will enjoy the numerous local attractions, in addition to learning opportunities and academic and professional interactions.

Flavia C. Delicato, Federal University of Rio de Janeiro, Brazil
Sozo Inoue, Kyushu Institute of Technology / Riken, Japan
General Chairs of PICom 2019

Jane Hsu, National Taiwan University, Taiwan
Program Chairs of PICom 2019
Message from CBDCom 2019
Program Chairs and General Chairs

On behalf of the Program Committee of the 5th IEEE International Conference on Cloud and Big Data Computing (CBDCom 2019), we would like to welcome you to join the conference in Fukuoka, Japan, August 5-8, 2019.

The IEEE CBDCom 2019 conference is a premier forum for researchers, practitioners, developers and users who are interested in cloud computing and big data to explore new ideas, techniques and tools, as well as to exchange experience. Besides the latest research achievements, this conference also covers innovative commercial data management systems, innovative commercial applications of cloud computing and big data technology, and experience in applying recent research advances to real-world problems. IEEE CBDCom 2019 will be the fifth edition of the conference after the success of CBDCom 2015 in Beijing, CBDCom 2016 in Toulouse, CBDCom 2017 in San Francisco, and CBDCom 2018 in Guangzhou. It will continuously offer a platform for researchers to exchange novel studies, discuss important issues and explore key challenges in innovative cloud and big data for smarter world.

IEEE CBDCom 2019 is co-located with IEEE PICOM 2019, IEEE CyberSciTech, and IEEE DASC 2019. This year, IEEE CBDCom received 34 submissions, covering a wide range of topics. Each paper was reviewed by at least three experts in the field. Finally, after the rigorous peer review process, 15 regular papers, 5 work-in-progress papers and 4 posters were accepted for oral presentation at the conference and publication in the conference proceedings.

An international conference of this scale requires the support of many people. We would like to take this opportunity to thank all the members of the organizing and steering committee, especially the Steering Chairs Prof. Jianhua Ma and Prof. Laurence Yang, for their great support and guidance in the preparation of the conference. Thanks also go to the entire local arrangement committee members, including General Executive Chair Bernady O. Apduhan. We thank also all reviewers for their valuable time and effort in reviewing the papers. Last, but not least, we thank all of the authors for their creative and worthwhile contributions which make the high quality of IEEE CBDCom 2019. We hope you will enjoy the conference, and we wish you a pleasant stay in Fukuoka.

It was our great honor and pleasure to accept the responsibilities and challenges of Conference General and Program Chairs. We trust that you will enjoy the academic program of IEEE CBDCom 2019, and at the same time that you will be able to see some of the surrounding natural beauty of the region. We look forward to seeing you at the IEEE CBDCom 2019. Enjoy the conference, both technically and socially!

Anna Kobusinska, Poznan University of Technology, Poland
Peng Li, The University of Aizu, Japan
General Chairs of CBDCom 2019
Shu Tao, IBM T. J. Watson Research Center, USA
Xiaoyan Wang, Ibaraki University, Japan
Program Chairs of CBDCom 2019
Abstract: The growing presence of high-performance cameras and microphones throughout the everyday environment has enabled the remote acquisition of biometric identity information such as the face, voice, and gait and even fingerprints, veins, and iris that can be easily shared in cyberspace. This capability poses a threat in that it provides other means of “spoofing” biometric authentication systems in order to commit fraud. Measures must thus be taken to protect such systems against the misuse of biometric information. On the other hand, since biometric authentication has become widely used as a means of personal authentication, the provision of such biometric information at the time of authentication must be made as convenient as possible. This talk introduces the challenges faced regarding security and privacy against the acquisition of a person’s biometric identity information and the distribution of that information in cyberspace on the basis of that person’s wishes while maintaining the practical convenience of biometric authentication. It also describes fruitful demonstration testing using a prototype aimed at meeting these challenges.

Biography: Isao ECHIZEN received B.S., M.S., and D.E. degrees from the Tokyo Institute of Technology, Japan, in 1995, 1997, and 2003, respectively. He joined Hitachi, Ltd. in 1997, and until 2007 was a research engineer in the company’s systems development laboratory. He is currently a deputy director general of the National Institute of Informatics (NII), a professor and director of the Information and Society Research Division of NII, and a professor in the Department of Informatics, the School of Multidisciplinary Sciences, the Graduate University For Advanced Studies (SOKENDAI). He is also a visiting professor at Tsuda University and was a visiting professor at the University of Freiburg in 2010 and at the University of Halle-Wittenberg in 2011. His research has focused on information security and media security and privacy. He received the Best Paper Award from the IPSJ in 2005 and 2014, the Fujio Frontier Award and the Image Electronics Technology Award in 2010, the One of the Best Papers Award from the Information Security and Privacy Conference and the IPSJ Nagao Special Researcher Award in 2011, the Docomo Mobile Science Award in 2014, the Information Security Cultural Award in 2016, and the Best Paper Award at the IEEE WIFS 2017. He is a member of the Information Forensics and Security Technical Committee and the IEEE Signal Processing Society.
AUG 5 (Day 1) 11:20–12:00 Keynote II

Ranking and Scoring for Data Analytics and Combinatorial Fusion

Frank HSU
Clavius Distinguished Professor / Director of Laboratory of Informatics and Data Mining, Fordham University, USA

https://www.fordham.edu/info/25112/cis_faculty_and_administration/7484/frank_hsu

Abstract: In the Cyber-Physical-Natural (CPN) ecosystem, everyone is an information user and an information provider. This level of complexity has produced ample opportunity but created many challenges for data analytics and model fusion. The situation in the big data era requires intricate experiments with more variables (cues, criteria, features, attributes, or indicators) and larger number of hypotheses. In a new data analytic paradigm, various ensemble methods combining multiple models or multiple machine learning algorithms are now frequently used to improve forecasting, prediction, and decision making. However, it remains to be a challenging problem as to when and how to combine these models or systems. This keynote presentation will cover the design of intelligent scoring systems and discuss when and how multiple scoring systems (MSS's) should be combined using rank-score characteristic (RSC) function and cognitive diversity (CD). We illustrate methods and practices of this new paradigm in cyber science and technology with diverse examples ranging from figure skating judgement to drug discovery virtual screening (VS), from evidence review in e-discovery to intrusion detection in cybersecurity, and from network selection in wireless communication to multi-layer combinational fusion in deep learning.

Biography: D. Frank Hsu is the Clavius Distinguished Professor of Science, a professor of Computer and Information Science, and director of the Laboratory of Informatics and Data Mining at Fordham University in New York, USA. He was chair of the CIS Department and associate dean of the Graduate School of Arts and Sciences. He held visiting positions at JAIST, Keio University, MIT, Taiwan University, and University of Paris-Sud. Hsu's main research interests are: interconnection networks, graph database, micro- and macro-informatics, data science, and ensemble method; combinatorial fusion algorithm (CFA) with domain applications in STEM, computational social science, cognitive neuroscience, business, finance, and joint decision making. He has co-authored/co-edited 40 books and book chapters and published over 200 technical papers in journals and conference proceedings. Hsu is chair of New York Chapter of IEEE CIS Society and on ExCom of IEEE New York Section. He has been steering committee co-chair for the conference series I-SPAN. He has given over 400 presentations worldwide. Hsu served on many editorial boards including IEEE Transactions on Computers and IEEE Transactions on Reliability. He is on several editorial boards including IEEE Systems Journal, Brain Informatics, and Journal of Interconnection Networks. Among the honors and awards he received are IEEE-AINA Conference Best Paper Award, Foundation Fellow of the Institute of Combinatorics and Applications (ICA), Fellow of the Institute of Cognitive Informatics and Cognitive Computing (ICIC), Fellow of the New York Academy of Sciences (NYAS), and IBM Faculty Award. Hsu received his M.S. from the University of Texas at El Paso and Ph.D. from the University of Michigan. He is a Senior member of the IEEE.
Computational Behaviour Analysis for Cyber-Physical Systems within Smart World Development

Liming (Luke) CHEN
Professor, De Montfort University, UK

Abstract: We are living in an increasingly smarter world where we do business, communicate and recreate among and across physical, cyber, social and mental spaces. Cyber-physical systems (CPS) offers mechanisms, technologies and tools which integrate and interweave physical entities, e.g. the internet of things, smart objects and devices and embedded systems, cyber entities, e.g. apps, social software and algorithms, and mental machinery, to support and facilitate cross-space multi-modal interactions and functionalities. The challenge is how smart CPSs should or can be in order to meet varying needs of different cohorts of users, and one of the core enabling technologies is computational behaviour analysis which can discover individual users’ ways of performing tasks, thus supporting advanced features, such as adaptation, personalisation and decision-making recommendation. In this talk the speaker will characterise the smart world concepts, and examine closely the research issues, methodologies and approaches to computational behaviour analysis which underpin the new wave smart cyber-physical systems. After this he will present his recent research and initial results in e-learning, healthcare and social network analysis describing the latest behaviour modelling and analysis technologies. He will then discuss research challenges and future directions which are aimed at stimulating and enlightening new ideas and approaches in this emerging research area.

Biography: Liming (Luke) Chen is Professor of Computer Science in the School of Computer Science and Informatics, De Montfort University, UK. He received his BEng and MEng from Beijing Institute of Technology (BIT), China, and his Ph.D in Artificial Intelligence from De Montfort University, UK. His current research interests include data analytics, pervasive computing, artificial intelligence, user-centred intelligent systems and their applications in smart healthcare. Liming is an IET Fellow, an IEEE Senior Member, a co-founder and co-director of the UK-China Gait and Health Innovation Institute, the DMU-USTB (University of Science and Technology Beijing, China) Joint Research Lab. on Smart Healthcare, and the IEEE CIS “User-centred Smart Systems” Task Force. He is currently the coordinator of the EU Horizon2020 MSCA ITN ACROSSING project, and has serves as the principal investigator for the EU AAL PIA project, the MobileSage project and FP7 MICHELANGELO project, and a number of projects funded by industry and third countries. Liming has over 200 publications in internationally recognised journals, book series and conferences. He is the general chair or program chair for IEEE Smart World Congress 2019, IEEE UIC2017, IEEE HealthCom2017, SAI Computing 2017, IEEE UIC2016, IntelliSys2016, MoMM2015/2014/2013, SAI2015/2013, IWAAL2014, UCAMI2013, and an organising chair of many workshops such as Romart-City2016 and SAGAware2015/2012, associate editor of IEEE THMS, assistant EIC for IJPCC and guest editors for IEEE THMS, PMC and IJDSN. He has delivered over 20 talks, keynotes and seminars in various forums, conferences, industry and academic events.
AUG 6 (Day 2) 14:30–15:10 Keynote IV

On Liquid Software and the Programmable World

Cesare PAUTASSO
Professor, University of Lugano (USI), SWITZERLAND

http://www.pautasso.info

Abstract: Service-oriented computing has profoundly affected the personal computing experience. Users no longer run every application and store their data on a single computer. Instead they own and operate a complex multi-device ensemble made of desktop computers, laptops, tablets, phones, watches, glasses, cars, or any sort of internet-connected thing to manage their personal information and accomplish their tasks by accessing software delivered as a service. Many approaches to achieve a liquid user experience whereby data and software can seamlessly flow and adapt across smart devices are starting to appear within proprietary platforms relying on centralized solutions, where data is conveniently stored in the Cloud, outside the control of the users producing and consuming it. In this talk we discuss how the open Web currently undergoing a re-decentralization might still play an important role within a programmable smart world.

Biography: Cesare Pautasso is full professor at the Software Institute of the Faculty of Informatics at the University of Lugano, Switzerland. Previously he was a researcher at the IBM Zurich Research Lab and a senior researcher at ETH Zurich. He completed his graduate studies with a Ph.D. from ETH Zurich in 2004. His research group focuses on building experimental systems to explore the intersection of Software Architecture, Web Engineering and Business Process Management with research projects on liquid software, RESTful conversation mining, microservice performance benchmarking, and interactive Web presentations. He was the general chair of the ICWE 2016 and ECOWS 2011, program co-chair of ICSOC 2013, ECOWS 2010 and Software Composition 2008. He has also started the series of International Workshops on RESTful Design (WS-REST) at the WWW conference. He is co-editor of the IEEE Software Insights department. He has co-authored a book on SOA with REST: Principles, Patterns & Constraints for Building Enterprise Solutions with REST in 2012 and is currently finishing another titled "Just Send An Email: Anti-Patterns for email-centric organizations" available on Leanpub. You can find more details on http://www.pautasso.info and follow him @pautasso@scholar.social
Abstract: In Large Scale Computing System (LSCS), there is a critical and challenging issue: it is almost impossible for humans to manually diagnose/recover/defend numerous faults/failures/threatens/attacks of a great number of distributed components in a timely manner due to the large scale. The work presented integration of Artificial Intelligence into dependability issues of LSNS. It proposed a prototype technology to self-improve the reliability for LSNS to enable a LSCS self-learning capability. The model systematically built the architecture of BANS (Bionic Autonomic Nervous System) that is a kind of nature-inspired technology. The BANS architecture implemented cyber-neurons/axons/peripheral nerves/central nerves, and the AI algorithms embedded in the BANS combined Neural Network, Fuzzy Logic, and Multi-value Diagrams for supervised machine-learning and reinforcement self-learning. This innovative technology enabled LSCS the capability of self-diagnosis and self-healing functions.

Biography: Dr. Dai is Professor of University of Electronics Science and Technology of China (UESTC), and Dean of School of Cybersecurity at UESTC. Dr. Dai’s research mainly focuses on Reliability Modeling and Optimization for Large-Scale Networking Systems (LSNS). He has published about 200 articles, where there are 4 books, 128 journal papers including 56 IEEE/ACM Transactions papers, and 40 conference papers including 2 Best Paper Awards. According to Google Scholar, Dr. Dai’s papers are cited by others 4452 times and his h-index is 38 and i10-index is 88. Dr. Dai is continuously elected as “Chinese Most Cited Researchers” by Elsevier since 2015 every year till now, and was ranked No. 2 in 2017 in China in the field of “Safety, Risk, Reliability and Quality”. He is currently serving as the Associate Editor for IEEE Transactions on Reliability. Dr. Dai was also invited as Keynote Speakers for IEEE ISORC’05, ChinaSoft’11, ICCT’12 and iThings’16 etc.
Latest landscape of cyberattacks can be characterized with the diversification of attack methods using malwares such as targeted attacks, DoS attacks, Drive-by-Download, and with the variety of the attack targets such as governments, CII (automobiles, control systems etc.), companies, IoT devices. In addition, with the advent of new services/applications (e.g. IoT, Cloud, 5G) and technologies (e.g. Fintech, BlockChain), the attackers are able to expand the attack targets and upgrade/improve the attack methods.

In order to protect our valuable assets and systems from cyber threats and attacks, with comprehensive consideration through academia, governments, important infrastructures, enterprises and individuals, innovative and challenging cybersecurity measures are expected to be urgently and effectively researched and developed. In such a diverse and rapidly changing environment including increase of attack surfaces, this panel aims at providing an academic roundtable among world-class experts for scholars to brainstorm, exchange new ideas and innovative technologies, and even undertake joint research studies about cybersecurity research. The topics include but not limited to:

1) Observation of Cyber Threats and Attacks - Events Collections
2) Emerging, Promising and Challenging Cybersecurity Technologies
3) Observation of Cyber Threats and Attacks
4) Big data Analysis for Cybersecurity
5) How to share and distribute for Cybersecurity
6) How to collaborate and jointly study on Cybersecurity
7) How to settle and establish Cybersecurity Policy and Strategy for Research

Panel Chair & Moderator

Koji Nakao, Distinguished Researcher, NICT, Japan & Cybersecurity Advisor, National Center of Incident Readiness and Strategy for Cybersecurity, Cabinet Secretariat of Japan

Panelists

Stephen S. Yau, Professor, Arizona State University, USA & the Life Fellow of IEEE
Michael David, Professor, The National Intelligence University, USA
Zhong Chen, Professor, Peking University, China
Masato Terada, Professor, Tokyo Denki University, Japan
Day 1        Monday, 5th August 2019        Room: Tsutsuji

13:00 – 15:00 CyberSciTech Session 1: Cyberspace Theory & Technology

Chairs: Xiaokang Zhou

1. A Spark-based Approach for High-efficiency Embedded Feature Selection, Fan Zhou; Zhongyang Han; Jun Zhao; Wei Wang
2. A New Evolutionary Algorithm Based on Self-adaptive Grouping and Efficient Resource Allocation, Sen Liu; Liwen Liu; Xuyan Liu; Yuping Wang; Baoming Bai
3. Two-layer Group Signature and Application to E-cash, Hanwen Feng; Jianwei Liu; Qianhong Wu, Tongge Xu
4. Study on Quantization Decision Algorithm for Feature Matching of Turf Grass Introducing, Linjing Wei; Wenke Dong; Yangping Wang; Shirun Gan
5. Text Detection on Books Using CNN Trained with Another Domain Data, Riku Anegawa; Masayoshi Aritsugi
6. A Knowledge-based Multiplayer Collaborative Routing in Opportunistic Networks, Xiaoheng Deng; Huan Chen; Ruting Cai; Feng Zeng; Guangquan Xu; Honggang Zhang

15:20 – 17:00 CyberSciTech Session 2: Cyber Security, Privacy & Trust

Chair: Hao Wang

1. Consistent Offline Update of Suspended Virtual Machines in Clouds, Kenichi Kourai; Yuji Shiota
2. A Pseudonym Certificate Management Scheme Based on Blockchain for Internet of Vehicles, Shihan Bao; Ao Lei; Haitham Cruickshank; Zhili Sun; Philip Asuquo; Waleed Hathal
3. Searchable Encryption Using Secret-Sharing Scheme for Multiple Keyword Search Using Conjunctive and Disjunctive Searching, Ahmad Akmal Aminuddin Mohd Kamal; Keiichi Iwamura
4. C3-Sex: a Chatbot to Chase Cyber Perverts, Daniel Diaz; Jossie Esteban Murcia; Félix Gómez Mármol; Sebastian Moreno Rodriguez
5. Privacy-preserving Deep Learning Models for Law Big Data Feature Learning, Xu Yuan; Jianing Zhang; Zhikui Chen; Jing Gao; Peng Li
Day 1  Monday, 5th August 2019 Room: Shobu

13:00 – 15:00 PICom Session 1: Computational Intelligence
Chair: Nicolas Tsapatsoulis

1. Generative Model for Probabilistic Inference, Yi Liu; Yunchun Li; Honggang Zhou; Hailong Yang; Wei Li
2. A Denoising Framework for Image Caption, Yulong Zhang; Yuxin Ding; Rui Wu; Fuxing Xue
3. Improved Medical Image Segmentation Algorithm Using Two-step CNN Architecture, Migyung Cho; Uram Ko; Hyekyung Lee; Hwan-Gue Cho
5. Composite Gaussian Distribution Modeling of Mobility Prediction Accuracy for Wireless Users, Lu Liu; Wuyang Zhou; Sihai Zhang; Wei Cai
6. Regression Training Using Model Parallelism in a Distributed Cloud, Joel Reijonen; Miljenko Opsenica; Roberto Morabito; Miika K.T. Komu; Mohammed Salem Elmusrati

15:20 – 17:00 PICom Session 2: Activity Recognition and Ubiquitous Systems
Chair: Md. Atiqur Rahman Ahad

1. Context-aware Voice-based Interaction in Smart Home - VocADom@A4H Corpus Collection and Empirical Assessment of Its Usefulness, François Portet; Sybille Caffiau; Fabien Ringeval; Michel Vacher; Nicola Bonnefond; Solange Rossato; Benjamin Lecouteux; Thierry Desot
2. Lightweight Polygonal Approximation-based ECG Signal Processing Platform, Daejin Park; Junho Kwak; Jeonghun Cho; SeungMin Lee
3. Automatic Localization of Passive Infra-red Binary Sensors in Home: From Dense to Scattered Network, Nathavuth Kitbutrawat; François Portet; Hirozumi Yamaguchi; Teruo Higashino
4. Evaluation of Transfer Learning for Human Activity Recognition among Different Datasets, Md Shafiqul Islam; Tsuyoshii Okita; Sozo Inoue
5. Achieving Accurate Ubiquitous Sleep Sensing with Consumer Wearable Activity Wristbands Using Multi-class Imbalanced Classification, Zilu Liang; Mario Alberto Chapa Martell
Day 1      Monday, 5\textsuperscript{th} August 2019         Room: Momiji

13:00 – 15:00 DASC Session 1: Dependability and Security for Hardware, Software and Data

Chair: Aniello Castiglione

1. Stuck-at Fault Resilience using Redundant Transistor Logic Gates, Richard McWilliam; Philipp Schiefer; Alan Purvis; Samir Khan
2. Low-cost and Fast Failure Recovery Using In-VM Containers in Clouds, Tomonori Morikawa; Kenichi Kourai
3. Privacy-enabled Recommendations for Software Vulnerabilities, Linus Karlsson; Nicolae Paladi
4. Distributed Data Anonymization, Mina Sheikhalishahi
5. Identifying Data Exposure Across Distributed High-Dimensional Health Data Silos Through Bayesian Networks Optimised by Multigrid and Manifold, Nikolai J Podlesny; Anne Kayem; Christoph Meinel

15:20 – 17:00 DASC Session 2: Emerging Applications of Secure and Dependable Computing

Chair: Naohiro Hayashibara

1. Keep Rogue IoT Away: IoT Detector based on Diversified TLS Negotiation, Chih-Wen Ou; Fu-hau Hsu, Chia-Min Lai
2. IoT based Hybrid Green Energy Driven Highway lighting System, Md Arafatur Arafatur Rahman; Marufa Y. Mukta; Abu Yousuf; A. Taufiq Asyhari; Md. Zakirul Alam Bhuiyan; Che Yahaya Yaakub
3. A Novel Blockchain Scheme Combining Prime Numbers and Iris for Encrypting Coding, Iovane Gerardo; Barra Silvio; Castiglione Aniello; Chinnici Marta; Nappi Michele; Petrosino Alfredo
4. Towards a Privacy-Preserving Voting System Through Blockchain Technologies, Rabeya Bosri; Abdur Razzak Uzzal; Abdullah Al Omar; A S M Touhidul Hasan; Md Zakirul Alam Bhuiyan
5. Analysis of Community in Social Networks Based on Game Theory, Flora Amato; Aniello Castiglione; Vincenzo Moscato; Giancarlo Sperlì
13:00 – 15:00 CBDCom Session 1: Cloud Computing and IoT
Chair: Frank Hsu

1. A Page Cache Management Scheme in Cloud Computing Environments, Hsung-Pin Chang; Chien-Neng Liao; Da-Wei Chang
2. Dynamic Controller-switch Mapping Assignment with Genetic Algorithm for Multi-controller SDN, Biao Han; Xiangrui Yang; Xiaoyan Wang
3. A Programming Environment for Visual IoT on Raspberry Pi, Ken T. Murata; Praphan Pavarangkoon; Somnuk Phon-Amnuaisuk; Takamichi Mizuhara; Kazunori Yamamoto; Kazuya Muranaga; Toshiki Aoki
4. Predicting Food POI Attractions for Smart Business Using Passenger Commuting Patterns, Syed Muhammad Asim Ali Rizvi; Weifeng Lv; Bowen Du; Haiquan Wang; Runhe Huang
5. Age of Information-aware Multi-tenant Resource Orchestration in Network Slicing, Xianfu Chen; Celimuge Wu; Tao Chen; Nan Wu; Honggang Zhang; Yusheng Ji
6. Bis: A Novel Blockchain Based Bank-tax Interaction System in Smart City, Zhihui Lu; Xiaoli Wan; Jian Yang; Jie Wu; Cheng Zhang; Patrick C. K. Hung; Shih-Chia Huang

15:20 – 17:00 CBDCom Session 2: Data Science and Analytics
Chair: Xiaoyan Wang

1. Utilizing Latent Posting Style for Authorship Attribution on Short Texts, Patamawadee Leepaisomboon; Mizuho Iwaihara
2. Evaluating The Performance of Machine Learning Sentiment Analysis Algorithms in Software Engineering, Omair Shafiq
3. Hybrid Machine Learning Approach for Electric Load Forecasting, Jui-Chieh Kao; Chun-Chih Lo; Chin-Shiuh Shieh; Yu-Cheng Liao; Jun-Wei Liu; Mong-Fong Horng
4. Consumer Segmentation: Improving Energy Demand Management Through Households Socio-Analytics, Shailendra Singh; Yassine Abdulsalam; Rachid Benlamri
5. Gold Price Forecast Based on LSTM-CNN Model, Zhanhong He; Junhao Zhou; Hong-Ning Dai; Hao Wang
Day 2      Tuesday, 6th August 2019             Room: 12105

09:00 – 10:20 CyberSciTech Session 3: Cyber Physical Computing & Systems
Chair: Ke Yan
1. IoT Nodes Equipment Selection Based on MADM: A Case Study of Groundwater Quality Detection Equipment, Wei He; Jing Wang; Beng Wu; Hui Luan; Hua-qing Liang; Chong Chen
2. A Home-based IoT-enabled Framework for Sleep Behaviour Assessment, Sarah Fallmann; Liming Luke Chen; Feng Chen
3. Deep Learning Technology for Chiller Faults Diagnosis, Ke Yan; Jun Hua
4. Research on Temporary Building Monitoring of Railway Construction Based on Remote Sensing Image, Yangping Wang

11:20 – 12:40 CyberSciTech Session 4: Cyber Social Computing & Networks
Chair: Klimis Ntalianis
1. The Central Community of Twitter Ego-networks as a Means for Fake Influencer Detection, Nicolas Tsapatsoulis; Vasiliki Anastasopoulou; Klimis Ntalianis
2. Towards Integrative Personal Character Modeling Using Multi-Level Fusion Across Scenarios and Periods, Ao Guo; Jianhua Ma
3. Hybrid Collaborative Filtering with Semi-stacked Denoising Autoencoders for Recommendation, Hairui Zou; Chaoxian Chen; Changjian Zhao; Bo Yang; Zhongfeng Kang
4. Many-to-Many Collaborator Recommendation Based on Matching Markets Theory, Xiangjie Kong; Linyan Wen; Jing Ren; Mingliang Hou; Minghao Zhang; Kang Liu; Feng Xia
Day 2  Tuesday, 6th August 2019  Room: 12106

09:00 – 10:20 PICom Session 3: Intelligent Middleware and Applications

Chair: Claudio Miceli

1. A Novel Algorithm for Efficient Labeling and Its Application to On-Road Risk Detection, Yixin Hu; Zhao Qiangfu; Yoichi Tomioka
2. Exploiting Spatial Locality for Content Placement in Roadside-Unit Caching with Delay Constraint, Sok-Ian Sou; Ciao-Ling Lou; Yinman Lee
3. Bringing 5G into User's Smart Home, Bruno Dzogovic; Bernardo de Matos Patrocínio dos Santos; Thanh van Do; van Thuan Do; Boning Feng; Niels Jacot
4. Intelligence Stratum for IoT. Architecture Requirements and Functions, Edgar J Ramos; Roberto Morabito

11:20 – 12:40 PICom Session 4: Pervasive and Embedded Computing

Chair: Sozo Inoue

1. Hardware-accelerated Similarity Search with Multi-index Hashing, Leandro Santiago de Araújo; Victor Cruz Ferreira; Brunno Figueroa Goldstein; Alexandre Solon Nery; Leandro Augusto Justen Marzulo; Sandip Kundu; Felipe M. G. França
2. WiTrack: Human-to-Human Mobility Relationship Tracking in Indoor Environments Based on Spatio-temporal Wireless Signal Strength, Ting-Han Chen; Sok-Ian Sou; Yinman Lee
3. Camera-in-Hand Robotic Arm Using a Deep Neural Network to Realize Unmanned Store Service, Oscal T.-C. Chen; Yu Cheng Zhang; Zheng Kuan Lin; Pei-I Kuo; Yi Lun Lee
4. A Density-based Decision-making Data Fusion Method for Multiapplication Wireless Sensor Networks, Claudio M. Farias; Flávia Coimbra Delicato; Giancarlo Fortino
09:00 – 10:20 DASC WiP Session

Chair: Tadashi Dohi

1. Reconfigurable Fault-Safe Processor Platform Based on RISC-V for Large-Scaled IoT-driven Applications, Daejin Park; Hyeon-Gyun Moon; Jeonghun Cho
2. SMT-based Bounded Model Checking of Embedded Assembly Program with Interruptions, Kosuke Uemura; Satoshi Yamane
3. TraceFilter: An Exploitability Analyzer of Vulnerabilities in Binary Code, Eun-Sun Cho; Seong-Kyun Mok
4. Towards Enabling Autonomic Computing in IoT Ecosystem, Mohammad Tahir; Qazi Mamoon Ashraf; Mohammad Dabbagh
5. HiMessage: An Interactive Voice Mail System with the Humanoid Robot, Pepper Carmen Bisogni; Paola Barra; Antonio Rapuano; Andrea F. Abate; Gerardo Iovane

11:20 – 12:40 Workshop on Intelligence Big Data Processing Infrastructure and Its Applications

Chair: Jingtao Sun

1. Information Entropy Differential Privacy: Differential Privacy Protection Data Publishing Method Based on Rough Set Theory, Xianxian Li, Chunfeng Luo, Peng Liu, Li-e Wang
2. Improved SLAM Merged 2D and 3D Sensors for Mobile Robots, Hanghang Deng; Qiang Wang; Jingtao Sun
3. Combinatorial Properties of Multimedia IPP Codes of Length 2, Jing Jiang; Chengyao Zhao; Minquan Cheng; Hongyan Dong
4. Symmetric and Positive Splitting Iteration for Space Fractional Diffusion Equation, Zhixuan Huang
5. A Threshold-based Visual Odometry in a Composite Environment Using Edges and Points, Shuxuan Lu; Qiang Wang; Jingtao Sun
Day 2      Tuesday, 6th August 2019             Room: 12109

09:00 – 10:20 CBDCom Session 3: Big Data and Applications
Chair: Emi Yuda

1. L-DAG: Enabling Loopy Workflow in Scientific Application with Automatic DAG Transformation, Xin You; Hailong Yang; Zhongzhi Luan; Depei Qian
2. Base Station Allocation for Users with Overlapping Coverage in Wirelessly Networked Disaster Areas, Yu Wang; Michael C Meyer; Junbo Wang
3. Multi-factor Based Stock Price Prediction Using Hybrid Neural Networks with Attention Mechanism, Chen Li; Xu Zhang; Mahboob Qaosar; Saleh Ahmed; Kazi Md. Rokibul Alam; Yasuhiko Morimoto
4. The Comparison and Verification of Some Efficient Packet Capture and Processing Technologies, Jiaqian Li; Chengrong Wu; Jiawei Ye; Jiong Ding; Qinwei Fu; Jiatao Huang

11:20 – 12:40 CBDCom WiP Session
Chair: Peng Li

1. LoRa Communication Maps of Medium-sized Rural City in Japan via Community Bus Services, Ken T. Murata; Kohei Mizutani; Yoshiaki Muroyama; Kazunori Yamamoto; Kazuya Muranaga; Takamichi Mizuhara; Praphan Pavarangkoon; Kazuki Kobayashi
2. Big Data Analytics for Personalized Recommendation Systems, Carson K. Leung
3. Sentiment Analysis on Tweets Using Machine Learning and Combinatorial Fusion, James Ho; Frank Hsu; Dominik Ondusko; Brandon Roy
4. Traffic Flow Prediction with Compact Neural Networks, Yuhang Li; Celimuge Wu; Tsutomu Yoshinaga; Yusheng Ji
5. Adaptive Confidence Evaluation Scheme for Periodic Activity Recognition in Smart Home Environments, Yi-en Tan; Chun-Chih Lo; Chin-Shiuh Shieh; Denis Miu; Mong-Fong Horng
Day 2  Tuesday, 6th August 2019  Room: 12104

09:00 – 10:20 CyberSciTech WiP Session 1: Cyber Security, Privacy & Trust 1  
Chair: Yaokai Feng

1. Location Privacy Protection Method Based on a Proxy in Untrusted Mobile Social Networks, Bidi Ying; Amiya Nayak
2. FalcoEye: A High-performance Distributed Security Scanning System, Cheng Wang; Xiaokang Zhou; Dong Lv; Xin Liu; Rui Zhou; Qingquan Lv; Mingsong Wang
4. A Sequential Scheme for Detecting Cyber Attacks in IoT Environment, Yan Naung Soe
5. Security and Trust Issues on Digital Supply Chain, Haibo Zhang; Toru Nakamura; Kouichi Sakurai

11:20 – 12:40 CyberSciTech WiP Session 2: Cyber Security, Privacy & Trust 2  
Chair: Celimuge Wu

1. Traceable Decentralized Anonymous E-cash System Against Active Attackers, Hanwen Feng; Jianwei Liu; Qianhong Wu, Tongge Xu
2. Practical Key Recovery Model for Self-Sovereign Digital Wallets - Work in Progress, Reza Soltani; Uyen Trang Nguyen; Aijun An
3. Power of Communication Behind Extreme Cybersecurity Incidents, Masato Kikuchi; Takao Okubo
5. Applying SMOTE for a Sequential Classifiers Combination Method to Improve the Performance of Intrusion Detection System, Sornxayya Phetlasy, Satoshi Ohzahata, Celimuge Wu, Toshihito Kato
Day 2       Tuesday, 6th August 2019

10:20 – 11:20 CyberSciTech/PICom/DASC/CBDCom Poster Session

Chair: Bernady O. Apduhan, Nicolas Tsapatsoulis, Xiaokang Zhou, Peng Li

1. A Proposal of Music-based Personal Authentication System, Shusei Narumi; Mitsuharu Matsumoto
2. Policy Management Technique Using Blockchain for Cloud VM Migration, Toshihiro Uchibayashi; Bernady Apduhan; Norio Shiratori; Takuo Suganuma; Masahiro Hiji
3. Semantic Model for Creating an Instance of IoT/IoE, Radmila Juric
4. The Implementation of Wireless Industrial Internet of Things (IIoT) Based upon IEEE 802.15.4-2015 TSCH Access Mode, Ho-Ting Wu; Kai-Wei Ke; Song-Ferng Wang; Po-Hung Chen; Guan-De Lee; Chen-Yu Tseng; Chen-Yu Ho
5. A Method of Classifying Japanese Sign Language Using Gathered Image Generation and Convolutional Neural Networks, Shin-ichi Ito; Momoyo Ito; Minoru Fukumi
6. Diffusion Kernel Based Mobility Prediction for Wireless Users, Lu Liu; Sihai Zhang; Wuyang Zhou; Wei Cai; Qimei Cui
7. Optimal Resource Reservation Scheme for Maximizing Profit of Service Providers in Edge Computing Federation, Yuan-sheng Luo; Shi Qiu
9. Extensible On-body Smartphone Localization: A Project Overview and Preliminary Experiment, Mitsuaki Saito; Kaori Fujinami
10. A Framework for Human-centric Personalization of Context Recognition Models on Mobile Devices, Kaori Fujinami; Trang Vu; Koji Sato
11. Internet of Things in Agriculture: A Decision Support System for Precision Farming, Lambros Lambrinos
12. A Framework of Page Synchronization for Adaptable Virtual Machine Live Migration, Cho-Chin Lin; Wei Ping Goh; Shyi-Tsong Wu
13. Performance Improvement of High-Speed File Transfer over JHPCN, Praphan Pavarangkoon; Ken T. Murata; Kazunori Yamamoto; Kazuya Muranaga; Takamichi Mizuhara; Keiichiro Fukazawa; Ryusuke Egawa; Takahiro Katagiri; Masao Ogino; Takeshi Nanri
14. A Tensor Model for Quality Analysis in Industrial Drinking Water Supply System, Di Wu; Hao Wang; Razak Seidu
15. Dynamic Replication Scheduling for Cloud Datacenters Based On Workload Statistics, Yu-Ju Chen; Wan-Chi Chang; Pi-Chung Wang
Day 3  Wednesday, 7th August 2019  Room: Tsutsuji

09:00 – 10:20 CyberSciTech WiP Session 3: Cyberspace Theory & Technology

Chair: Oscar Lin

1. A Review of Issues and Challenges in Fog Computing Environment, Chenlei Liu; Feng Xiang; Pan Wang; Zhixin Sun
2. A Distributed Video Analytics Architecture Based on Edge-Computing and Federated Learning, Abdelkarim Ben Sada; Mohammed Amine Bouras; Jianhua Ma; Runhe Huang; Huansheng Ning
3. A Novel Strategy for Barrier Confident Information Coverage in Sensor Networks, Yalan Jiang; Lingzhi Yi; Lu Zhu; Zhenkun Jin; Xianjun Deng; Minghua Wang
5. Mining Key Scholars via Collapsed Core, Shuo Yu; Yuanhu Liu; Jing Ren; Hayat Dino Bedru; Teshome Megersa Bekele; Liangtian Wan; Feng Xia

10:40 – 12:00 CyberSciTech WiP Session 4: Cyber Physical Computing & Systems

Chair: Liming Chen

1. An Assistive Augmented Reality-based Smartglasses Solution for Individuals with Autism Spectrum Disorder, Eduardo Machado; Liming Luke Chen; David Saldaña; Ivan Carrillo
2. Computational Model for Wearable Hardware Commodities, Karoline McClenaghan; Ole Christian Moholth
3. CPG-FS: A CPU Performance Graph Based Device Fingerprint Scheme for Devices Identification and Authentication, Shiquan Dong; Fadi Farha; Shan Cui; Jianhua Ma; Huansheng Ning
4. Industrial Control Network Security Analysis and Decision-making by Reasoning Method Based on Strong Relevant Logic, Hongbiao Gao; Jianbin Li; Jingde Cheng
5. ICA Based EEG Feature Analysis and Classification of Learning Styles, Khawla Alhasan; Suleiman Aliyu; Liming Luke Chen; Feng Chen

13:00 – 15:00 CyberSciTech Session 5: Cyber Intelligence & Cognitive Science

Chair: Henry Leung

1. KID Model Realization Using Memory Networks for Text-based Q/A Analyses and Learning, Jiandong Li; Runhe Huang; Kevin I-Kai Wang; Jiannong Cao
2. Engagement Detection in E-learning Environments Using Convolutional Neural Networks, Mahbub Murshed; M. Ali Akber Dewan; Fuhua Lin; Dunwei (Grant) Wen
3. Multi-trait Selection Model of Dairy Cow Based on the Mixed Leapfrog Algorithm, Linjing Wei; Wenke Dong; Yangping Wang; Shirun Gan
4. Pop-up Recommended Illustrations for E-book Readers Using Text Analysis Techniques, Masato Shimokubo; Kevin I-Kai Wang; Runhe Huang
5. Research on Vehicle Routing Problem with Time Windows Based on the Dragonfly Algorithm, Chenlei Liu; Wenhao Tao; Chencong Zhao; Xinwan Li; Yaning Su; Zhixin Sun
6. Prediction of Stock Prices with Sentiment Fusion and SVM Granger Causality, King Ma; Henry Leung; Jintak Park
15:20 – 17:00 CyberSciTech Session 6: Cyber Life & Wellbeing

Chair: Lai Tu

1. Analysis and Prediction of Differential Parking Behaviors, Lai Tu; Zhen Ma; Benxiong Huang
2. A Design of High-performance Streetlights Management System, Sheng Bi; Min Dong; Boyu Sun; Kaihong Yang
3. Visualization Design Based on Personal Health Data and Persona Analysis, Zhi Li; Qun Jin
4. Culture-based Color Influence Paths Analysis by Using Eye-tracking Devices, Bo Wu; Shoji Nishimura; Qun Jin; Yishui Zhu
5. Study on the Matching Algorithm of Turf Grass Introduction Features Based on Big Data Analysis, Linjing Wei; Wenke Dong; Shirun Gan; Yangping Wang
Day 3  Wednesday, 7th August 2019  Room: Shobu

09:00 – 10:20 Workshop on Secure and Sustainable Computing and Communication Technologies for Smart Communities

Chair: Haotong Cao

1. The Extraction of Key Distinct Features for Identification and Classification of Helicopters Using Micro-Doppler Signatures, Vikas Agnihotri; Munish Sabharwal; Vinay Goyal
2. Rate Maximization for Cell-Free Massive MIMO with Low-Resolution ADCs, Yao Zhang; Haotong Cao; Meng Zhou; Shengchen Wu; Longxiang Yang
3. Blockchain as a Service for Software Defined Networks: A Denial of Service Attack Perspective, Arnab Bose; Gagangeet Singh Aujla; Maninderpal Singh; Neeraj Kumar; Haotong Cao
4. Software Defined UAV-based Location Aware Deployment Scheme for Optimal Wireless Coverage, Sahil Vashisht; Sushma Jain; Ravinder Mann
5. IPTV Video Hardware Encryption Transmission System Analysis, Qin Wang; Feng Zhang

10:40 – 12:00 CyberSciTech WiP Session 5: Cyber Intelligence & Cognitive Science

Chair: Ali Akber Dewan

1. Product Surface Defect Detection Based on CNN Ensemble with Rejection, Kai Su; Zhao Qiangfu; Po Chun Lien
2. Evaluation Approach Based Upon Knowledge Delivery Process in Smart Teaching Environment, Chenzhang Zhang, Huizhuang Zhang, Di He, Fei Hao
3. An Incremental Broad Learning Approach for Semi-supervised Classification, Xize Liu, Tie Qiu, Chen Chen, Huansheng Ning, Ning Chen
4. Data Mining and Machine Learning Applications for Educational Big Data in the University, Keisuke Abe
5. Online Ventricular Segmentation System Based on Machine Learning, Yilin Hu, Hang Yin, Binbin Yong, Yunshan Cao, Xing Zhou, Rui Zhou, Qingquan Lv, Mingsong Wang

13:00 – 15:00 Workshop on Healthcare with Intelligent Sensing, System, and Data

Chair: Wasim Ahmad

1. Emotion Recognition from Speech to Improve Human-Robot Interaction, Wasim Ahmad; Changrui Zhu
2. Energy-Efficient Signal Processors with Silent Mirror Tracer for Long-Term Activity Monitoring, Daejin Park; Jaeyong Jung; Jeonghun Cho
4. Health Activities Monitoring and Warning System for Geriatric Daily Living in Extra Care Homes, Hua Li; Cheng Yang; Zhilin He; Muhammad Ali Imran; Wasim Ahmad

34
5. Inertial Sensors to Detect Multiple Gait Disorders, Wenhao Cheng; Yuxiang Guo; Pengting Chen; Yue Pang; Xinyun Jiang; Wasim Ahmad

6. Assistive and Monitoring Multifunctional Smart Crutch for Elderly, Jiaye Yang; Yanjun Liu; Yanjun Chen; Huiyang Nie; Wang Zhanqiu; Liu Xu; Muhammad Ali Imran; Wasim Ahmad

7. Novel Flexible and Wearable 2.4 GHz Antenna for Body Centric Applications, Abdoalbaset Abohmra; Sophia Ramani; Abubakar Sharif; Muhammad Ali Imran; Qammer H Abbasi; Wasim Ahmad

15:20 – 17:00 Special Session on Computing and Applications for Cyber Internet of Things (CyberIoT) / Special Session on the Impact of Internet of Things on the Future Elderly Care (IoTonFEC)

Chair: Hong Chen

1. AgentPi: An IoT Enabled Motion CCTV Surveillance System, Farhad Mehdipour

2. An Efficient Synchronization Algorithm in OFDM-based NB-IoT Systems, Yuxiang LV; Hao Qin; Zhiwei Liu; YaWen Dong; Weiyang Xu; Wenjiang Feng

3. An Emergency Mobile Communication System Based on Fixed-Wing Drone and Satellite Transmission Access, Yu Su

4. Joint Power Control and Pilot Assignment Algorithm in Multi-cell Multi-user Massive MIMO systems, Yuxiang LV; Qing Wu; Yajuan Guo; Zhiwei Liu; Xiaolong Bao; Wenjiang Feng

5. A Study on the Reduction of Mowing Work Burden for Maintaining Landscapes in Rural Areas: Experiment Design for Mowing Behaviors Analyze, BO WU; Yuan Wu; Yoko Aoki; Shoji Nishimura; Masayuki Kashiwagi

6. Life Assistants for the Elderly Based on Mobile Devices, Wenjie Diao, Zhigang Gao, Ruichao Xu, Yunfeng Xie, Ke Yan, Hongyi Guo

7. Ubi-care: A Decentralized Ubiquitous Sensing Healthcare System for the Elderly Living Support, Hong Chen
Day 3  Wednesday, 7th August 2019  Room: Momiji

09:00 – 10:20 Special Session on Cyber System Security and Intelligence 1
Chair: Chuan Luo

1. An IGS Algorithm Applied to DNA Sequence Design, Kaiqiang Liu; Bin Wang; Yuan Liu; Ranfeng Wu; Xun Zhang; Xin Liu; Qiang Zhang; Zhixiang Yin
2. An Incremental Feature Selection Approach Based on Information Entropy for Incomplete Data, Chuan Luo; Tianrui Li; Zhang Yi
3. An Internet Medical Care-oriented Service Security Open Platform, Kexiong Dong; Weiwei Luo; Xiaohua Pan; Jianwei Yin
4. Commercial Security Scanning: Point-on-Sale (POS) Vulnerability and Mitigation Techniques, Farhad Mehdipour; Bahman A. Sarrafpour
5. Link Prediction Based on Gravitational Field of Complex Network, Yanlin Yang; Haixing Zhao; Zhonglin Ye; Lei Meng

10:40 – 12:00 Special Session on Cyber System Security and Intelligence 2
Chair: Zhen Liu

1. Pulmonary Nodule Detection Based on Multi-branch 3D Squeeze-and-excitation Network, Yuechao Zhang, Jianxin Zhang, Chao Che, Kai Lin, Dongsheng Zhou, Qiang Zhang, Xiaopeng Wei
2. Research on Security Testing and Simulation Platform of Smart Grid Substation System, Xue Yudai; Wang Jinsong; Ding Yuemin; Honghao Zhang
3. A Semantic-based Short-text Fast Clustering Method on Hotline Records in Chengdu, Xiaorong Pu; Kun Long; Kecheng Chen; Mei Xie; Jiancheng Lv; Dezong Peng
4. An Interactive System for Detection and Analysis of Mandibular Cystic Lesions, Jixiang Guo; Lei Zhang; Yuanyuan Chen; Wei Tang
5. Design, Development and Testing of a Wearable sEMG Acquisition System, Shi Lei; Wang Kunpeng; Zhen Liu

13:00 – 17:00 Workshop on Assurance in Distributed Systems and Networks
Chair: Tomohiro Otani, Tomoyuki Ohta, Junichi Funasaka, Tatsuhiro Tsuchiya

3. A Dynamic System for Forming Convoys Consisting of Connected Vehicles, Shinji Inoue; Kazuki Uyama; Yoshiaki Kakuda
4. Structural Change Models of Online Social Networks Caused by External Factors Like Mass Media, Yuya Kakizawa; Masaki Aida
5. Invited talk: Information Propagation That Induces Evacuation Behavior at the Time of Disaster, Eiji Utsunomiya
7. Development of Local Landslide Danger-Related Information Notification System on TV Set for Early Evacuation, Koichi Shin; Haruka Kodama; Masahiro Nishi
Day 3  Monday, 7th August 2019  Room: Ume

09:00 – 10:20 Workshop on Big Data Analytics for Cyber Security and Defence

Chair: Pinghui Wang

1. A Large-Scale Empirical Study of Internet Users' Privacy Leakage in China, Yuanming Zhang; Shuo Zhang; Yuchao Zhang
2. Big Data Driven Computing Offloading Scheme with Driverless Vehicles Assistance, Chengling Chen; Zhou Su; Weiwei Li; Yuntao Wang
3. Large-scale Network Traffic Analysis and Retrieval System Using CFS Algorithm, Ting Han; Yuanming Zhang; Hezhen Li; Xiaoyu Zhang; Jing Tao; Pinghui Wang
4. User Identification Cross Multiple Social Media Platform with Revised Input Output Network Embedding Framework, Jingyuan Liu; Wei Li; Tao Qin; Liang Zhao; Yuli Gao; Wenqiang Ma

10:40 – 12:00 Special Session on Cyber Social Computing and Cyber-Enabled Applications

Chair: Weimin Li

1. A Hybrid Algorithm for Influence Maximization of Social Networks, Yongze Lin; Xinyuan Zhang; Liting Xia; Yue Ren; Weimin Li
2. Clinical Knowledge Graph Embeddings with Hierarchical Structure for Thyroid Treatment Recommendation, Dehua Chen; Chuang Ma; Yunying Wu
3. Influence Maximization Based on Node Attraction Model, Gui Jiang Wang; Jiulei Jiang; Weimin Li; Can Wang
4. OCDAD: An Overlapping Community Detecting Algorithm Using Micro Network Model ex-EgoNet in Directed Networks, Furong Chang; Bofeng Zhang; Songxian Wu; Yue Zhao; Bingchun Li; Jiariila Maimaitiriyimu
5. Quantitative $\mu$-calculus Model Checking Algorithm Based on Generalized Possibility Measures, Panqing Zhang; Jiulei Jiang; Zhanyou Ma

13:00 – 15:00 Workshop on Dependable Intelligent Systems

Chair: Xiaoyi Zhang

2. Markov Model of Web Services for Their Performance Based on Phase-Type Expansion, Yanjie Liu; Jiantao Zhang
3. Experimental Study for Optimal Homotopy Property of Motion Planning Algorithms, Yang Liu; J ing Zhang; Yizhi Zeng; Haonan Yao; Jiantao Zhang
4. Multi-concern Integrated Engineering of Dependable Intelligent Systems, Elena Troubitsyna
5. RRT* Algorithm under Holonomic Conditions for UAVs, Minyang Kang; Yizhi Zeng; Haonan Yao
6. FPGA-Based Implementation of Reduced-Complexity Filtering Algorithm for Real-Time Location Tracking, Yih-Shyh Chiou, Wei-Ting Chen, Fu-Jung Wen, Shih-Lun Chen, Yang-Ke Lin, Ting-Lan Lin
7. Research on Reliable Path Planning of Manipulator Based on Artificial Beacons, Kai Zhao; Jia Song
Organizing Committee of CyberSciTech 2019

Honorary Chair
Norio Shiratori, Chuo University, Japan

General Chairs
Bernady O. Apduhan, Kyushu Sangyo University, Japan
Kouichi Sakurai, Kyushu University, Japan
Kevin I-Kai Wang, The University of Auckland, New Zealand

General Executive Chairs
Fuhua (Oscar) Lin, Athabasca University, Canada
Keiichi Iwamura, The Tokyo University of Science, Japan

Program Chairs
Henry Leung, The University of Calgary, Canada
Kim-Kwang Raymond Choo, The University of Texas at San Antonio, USA
Kenichi Kourai, Kyushu Institute of Technology, Japan

Program Co-Chairs
Katina Kralevska, Norwegian University of Science and Technology, Norway
Toshihiro Yamauchi, Okayama University, Japan
Yuji Suga, Internet Initiative Japan, Japan
Celimuge Wu, The University of Electro-Communications, Japan
Weimin Li, Shanghai University, China
Ali Akber Dewan, Athabasca University, Canada
Klimis Ntalianis, University of West Attica, Greece
Xiaokang Zhou, Shiga University, Japan

Workshop & Special Session Chairs
Wasim Ahmad, University of Glasgow, UK
Young-Hoon Park, Sookmyung Women's University, Korea
Zhou Su, Xi'an Jiaotong University, China

Panel Chair
Koji Nakao, NICT, Japan

Special Issue Chair
Yan Ke, China Jiliang University, China

International Liaison & Publicity Chairs
Masato Oguchi, Ochanomizu University, Japan
Lai Tu, Huazhong University of Science and Technology, China
Yier Jin, The University of Florida, USA
Syed Akhter Hossain, Daffodil International University, Bangladesh
Maciej Huk, Wroclaw University of Science & Technology, Poland
Chih-Chieh Hung, Tamkang University, Taiwan

Local Organizing Committee
Bernady O. Apduhan (Co-chair), Kyushu Sangyo University
Tadashi Dohi (Co-chair), Hiroshima University, Japan
Takashi Naka, Kyushu Sangyo University, Japan
Kai Cheng, Kyushu Sangyo University, Japan
Yoshihiro Yasutake, Kyushu Sangyo University, Japan
Chinasa Sueyoshi, Kyushu Sangyo University, Japan
Toshihiro Uchibayashi, Tohoku University, Japan
Web Chair
Hui Yie Teh, The University of Auckland, New Zealand

Steering Committee
Jianhua Ma (Chair), Hosei University, Japan
Hui-Huang Hsu, Tamkang University, Taiwan
Qun Jin, Waseda University, Japan
Jun Wang, University of Central Florida, USA
Laurence T. Yang, St. Francis Xavier University, Canada
Stephen S. Yau, Arizona State University, USA
Mazin Yousif, T-Systems International, USA
Albert Zomaya, The University of Sydney, Australia

Advisory Committee
Zhong Chen (Chair), Peking University, China
Runhe Huang (Chair), Hosei University, Japan
Mohammed Atiquzzaman, University of Oklahoma, USA
Payam Barnaghi, University of Surrey, UK
Julien Bourgeois, UBFC/FEMTO-ST Institute/CNRS, France
Tadashi Dohi, Hiroshima University, Japan
Song Guo, Hong Kong Polytechnic University, Hong Kong
Kien Hua, University of Central Florida, USA
Frank Hsu, Fordham University, USA
Seungcheon Kim, Hansung University, Korea
Qingyong Li, Beijing Jiaotong University, China
Shujun Li, University of Kent, UK
Jianwei Liu, Beihang University, China
Zhen Liu, Nagasaki Institute of Applied Science, Japan
Geyong Min, University of Exeter, UK
Huansheng Ning, University of Science and Technology Beijing (USTB), China
Yi Pan, Georgia State University, USA
Paulo Pires, Federal University of Rio de Janeiro, Brazil
Sanjay Ranka, University of Florida, USA
Boon-Chong Seet, Auckland University of Technology, New Zealand
Zhixin Sun, Nanjing University of Posts and Telecommunications, China
Rich Wolski, University of California at Santa Barbara, USA
Feng Xia, Dalian University of Technology, China
Zhiwen Yu, Northwestern Polytechnical University, China
Yanchun Zhang, Victoria University, Australia
Qiangfu Zhao, The University of Aizu, Japan
Qinggou Zhou, Lanzhou University, China

The 2nd International Workshop on Healthcare with Intelligent Sensing, System, and Data
Organizing Committee
Wasim Ahmad, University of Glasgow, UK
Francesco Fioranelli, University of Glasgow, UK
Kevin I-Kai Wang, University of Auckland, NZ
Muhammad A. Imran, University of Glasgow, UK
Qammer H. Abbasi, University of Glasgow, UK

The 1st International Workshop on Big Data Analytics for Cyber Security and Defence
Organizing Committee
Pinghui Wang, Xi’an Jiaotong University, China
Yanhua Li, Worcester Polytechnic Institute, USA
Special Session on Computing and Applications for Cyber Internet of Things Organizing Committee
Zhou Su, Xi’an Jiaotong University, China
Kan Yang, The University of Memphis, USA

Special Session on Cyber Social Computing and Cyber-Enabled Applications Organizing Committee
Weimin Li, Shanghai University, China
Qun Jin, Waseda University, Japan

Special Session on Cyber System Security and Intelligence Organizing Committee
Zhen Liu, Nagasaki Institute of Applied Science, Japan
Jinsong Wang, Tianjin University of Technology, China
Xiaohui Wei, Jilin University, China
Jianwei Yin, Zhejiang University, China
Qiang Zhang, Dalian University of Technology, China

Special Session on the Impact of Internet of Things on the Future Elderly Care Organizing Committee
Bo Wu, Waseda University, Japan
Hong Chen, Daichi Institute of Technology, Japan

Technical Program Committee of CyberSciTech 2019
Mitsuaki Akiyama, NTT, Japan
Thomas Austin, San Jose State University, USA
Khayrul Bashar, Ochanomizu University, Japan
María Bermúdez-Edo, University of Granada, Spain
Gergely Biczók, Budapest University of Technology and Economics, Hungary
Andrew Chen, The University of Auckland, New Zealand
Dehua Chen, Donghua University, P.R. China
Xianfu Chen, VTT Technical Research Centre of Finland, Finland
Chien-Fu Cheng, Tamkang University, Taiwan
Marta Chinnici, ENEA, Italy
Miguel De-la-torre, Universidad of Guadalajara, Mexico
Peng Dong, Shanghai Jiao Tong University, P.R. China
Chun-I Fan, National Sun Yat-sen University, Taiwan
Honghao Gao, Shanghai University, P.R. China
Michele Garau, NTNU- Norwegian University of Science and Technology, Norway
Vasileios Gkioulos, Norwegian University of Science and Technology, Norway
Danilo Gilgoroski, Norwegian University of Science and Technology, Norway
George Grispos, University of Nebraska at Omaha, USA
Bo Gu, Kogakuin University, Japan
Enamul Haque, York University, Canada
Takuya Hayashi, National Institute of Information and Communications Technology, Japan
Shirley He, Tencent Inc., P.R. China
Mario Hildebrandt, Otto von Guericke University Magdeburg, Germany
Tzung-Pei Hong, National University of Kaohsiung, Taiwan
Md. Shahedul Islam, Bangabandhu Sheikh Mujibur Rahman Maritime University, Bangladesh
Jiulei Jiang, North Minzu University, P.R. China
Hyungrok Jo, The University of Tokyo, Japan
Hasanul Kabir, Islamic University of Technology, Bangladesh
Ju Kanai, Toshiba Corporation, Japan
Kosuke Kaneko, Kyushu University, Japan
Hyung Chan Kim, NSR, Korea
Shinsaku Kiyomoto, KDDI R&D Laboratories Inc., Japan
Lanju Kong, Shandong University, P.R. China
Esmahi Larbi, Athabasca University, Canada
Gang Li, Deakin University, Australia
Kaitai Liang, University of Surrey, UK
Guoqiong Liao, Jiangxi University of Finance and Economics, P.R. China
Jianwei Liu, China University of Petroleum, P.R. China
Zhi Liu, Shizuoka University, Japan
Nai-Wei Lo, National Taiwan University of Science and Technology, Taiwan
Xin Lou, University of Chinese Academy of Sciences, P.R. China
Eleonora Losiouk, University of Padova, Italy
Shushuang Man, Southwest Minnesota State University, USA
Yoshifumi Manabe, Kogakuin University, Japan
Weizhi Meng, Technical University of Denmark, Denmark
Hristina Mihajloska, Faculty of Computer Science and Engineering, Macedonia
Mahbub Murshed, Athabasca University, Canada
Maria Ntaliani, Agricultural University of Athens, Greece
Ruxandra Olimid, University of Bucharest, Romania
Han Pan, Shanghai Jiao Tong University, P.R. China
Emmanouil Panaousis, University of Surrey, UK
Lianyong Qi, Qufu Normal University, P.R. China
Konstantinos Raftopoulos, NTUA, Greece
Xun Shao, Kitami Institute of Technology, Japan
Wook Shin, National Security Research Institute, Korea
Chunhua Sum, University of Aizu, Japan
Amril Syalim, Universitas Indonesia, Indonesia
Kenichi Takahashi, Tottori University, Japan
Suhua Tang, The University of Electro-Communications, Japan
Zenonas Theodosiou, Research Centre on Interactive Media, Cyprus
Costas Vassilakis, University of the Peloponnese, Greece
Vinod Kumar Verma, SLIET, India
Feng Wang, Guangdong University of Technology, P.R. China
Hao Wang, Norwegian University of Science and Technology, Norway
Jianjia Wang, Shanghai University, P.R. China
Junbo Wang, University of Aizu, Japan
Liqiang Wang, University of Central Florida, USA
Xiaofeng Wang, North Minzu University, P.R. China
Xiaoyan Wang, Ibaraki University, Japan
Dunwei Wen, Athabasca University, Canada
Yue Wu, Shanghai Jiaotong University, P.R. China
Minjun Xin, Shanghai University, P.R. China
Guangquan Xu, Tianjin University, P.R. China
Fuzhi Zhang, Yanshan University, P.R. China
Yan Yang, Changchun Normal University, P.R. China
Masaya Yasuda, Kyushu University, Japan
Kok-Lim Alvin Yau, Sunway University, Malaysia
Kuo-Hui Yeh, National Dong Hwa University, Taiwan
Wei Yuan, Huazhong University of Science and Technology, P.R. China
Cheng Zhang, Waseda University, Japan
Xiaokun Zhang, Athabasca University, Canada
Zhenkai Zhang, Jiangsu University of Science and Technology, P.R. China
Huan Zhao, Hunan University, P.R. China
Xiaoyao Zheng, Anhui Normal University, P.R. China
Junwu Zhu, Yangzhou University, P.R. China
Yaokai Feng, Kyushu University, Japan
Ao Guo, Hosei University, Japan
Organizing Committee of DASC 2019

Honorary Chairs
Nobuyasu Kanekawa, Hitachi, Ltd., Japan
Rajkumar Buyya, University of Melbourne, Australia

General Chairs
Tadashi Dohi, Hiroshima University, Japan
Md Zakirul Alam Bhuiyan, Fordham University, USA

General Executive Chair
Bernady O. Apduhan, Kyushu Sangyo University, Japan

Program Chair
Tatsuhiro Tsuchiya, Osaka University, Japan

Program Co-Chairs
Naohiro Hayashibara, Kyoto Sangyo University, Japan
Aniello Castiglione, University of Salerno, Italy
Zheng Zheng, Beihang University, China

Workshop / Special Session Chairs
Hiroshi Nakamura, University of Tokyo, Japan
Qin Liu, Hunan University, China

WiP/Poster/Demo Chairs
Kenichi Kourai, Kyushu Institute of Technology, Japan
Haider Abbas, National University of Science and Technology, Pakistan

International Liaison & Publicity Chairs
Kuan-Ching Li, Providence University, Taiwan
Syed Hassan Ahmed, Georgia Southern University, USA
Mamoun Alazab, Charles Darwin University, Australia
Bo Yang, University of Electronic Science and Technology of China, China
Michele Nappi, University of Salerno, Italy

Advisory Committee Chairs
Sy-Yen Kuo, National Taiwan University, Taiwan
Vincenzo Piuri, University of Milan, Italy
Mohammad Zulkernine, Queen's University, Canada

Steering Committee Chairs
Jianhua Ma, Hosei University, Japan
Laurence T. Yang, St. Francis Xavier University, Canada

The 18th International Workshop on Assurance in Distributed Systems and Networks
Organizing Committee
Tomohiro Otani, KDDI Research, Inc., Japan
Yoshiaki Kakuda, Hiroshima City University, Japan
Junichi Funasaka, Hiroshima City University, Japan
Guojun Wang, Guangzhou University, China
Elisa Bertino, Purdue University, USA
Felicia Di Giandomenico, ISTI-CNR, Italy

The 1st International Workshop on Dependable Intelligent Systems Organizing Committee
Zheng Zheng, Beihang University
Jianwen Xiang, Full Professor, Wuhan University of Technology
Jing Zhao, Dalian University of Technology
Beibei Yin, Beihang University
Organizing Committee of PICom 2019

**Honorary Chairs**
Albert Zomaya, University of Sydney, Australia
Hideyuki Tokuda, NICT and Keio University, Japan

**General Chairs**
Flavia C. Delicato, Federal University of Rio de Janeiro, Brazil
Sozo Inoue, Kyushu Institute of Technology / Riken, Japan

**General Executive Chairs**
Bernady O. Apduhan, Kyushu Sangyo University, Japan
Rossitza Marinova, Concordia University Edmonton, Canada

**Program Chairs**
Lidia Fuentes, Universidad de Málaga, Spain
Jane Hsu, National Taiwan University, Taiwan

**Track Chairs**
Track 1: Nicolas Tsapatsoulis, Cyprus University of Technology, Cyprus
Track 2: Claudio Miceli, Federal University of Rio de Janeiro, Brazil
Track 3: Pietro Manzoni, Universitat Politècnica de València, Spain
Track 4: Wei Li, University of Sydney, Australia
Track 5: Ren Ohmura, Toyohashi University of Technology, Japan & Kazuya Murao, Ritsumeikan University, Japan

**Workshop & Special Session Chairs**
Giancarlo Fortino, University of Calabria, Italy
Atiqur R. Ahad, University of Dhaka, Bangladesh / Osaka University, Japan

**International Liaison and Publicity Chairs**
Kazuaki Tanaka, Kyushu Institute of Technology, Japan
Taniro Chacon, Federal University of Rio Grande do Norte, Brazil
José M. Horcas, Universidad de Málaga, Spain
Ting Yang, Tianjin University, China
Houbing Song, Embry-Riddle Aeronautical University, USA

**Local Organizing Committee**
Bernady O. Apduhan (Co-chair), Kyushu Sangyo University
Tadashi Dohi (Co-chair), Hiroshima University, Japan
Takashi Naka, Kyushu Sangyo University, Japan
Kai Cheng, Kyushu Sangyo University, Japan
Yoshihiro Yasutake, Kyushu Sangyo University, Japan
Chinasa Sueyoshi, Kyushu Sangyo University, Japan

**Advisory Committee**
Seiichi Ozawa, Kobe University, Japan
Jianjun Zhao, Kyushu University, Japan
Zhikui Chen, Dalian University of Technology, China
Liqiang Wang, University of Central Florida, USA
Ramiro Liscano, University of Ontario Institute of Technology, Canada
Manuel Roveri, Politecnico di Milano, Italy

**Steering Committee**
Jianhua Ma, Hosei University, Japan
Laurence T. Yang, St. Francis Xavier University, Canada
Adnan Al-Anbuky, Auckland University of Technology, New Zealand

**The 3rd International Workshop on Secure and Sustainable Computing and Communication Technologies for Smart Communities Organizing Committee**
Neeraj Kumar, Thapar Institute of Engineering and Technology, Patiala (Punjab), India
The 1st International Workshop on Intelligence Big Data Processing Infrastructure and Its Applications Organizing Committee
Jingtao Sun, National Institute of Informatics, Japan
Cheng Yang, York University, Canada
Sai Ma, The University of Tokyo, Japan

Technical Program Committee of PICom 2019
Ahmed Khaled, Northeastern Illinois University, USA
Al-Sakib Khan, Pathan Southeast University, Bangladesh
Alessio Bechini, University of Pisa, Italy
Andreas Panayides, University of Cyprus, Cyprus
Antonio Guerrieri, ICAR-CNR, Italy
Carlos Calafate, Universidad Politècnica de Valencia, Spain
Carmela Comito, University of Calabria, Italy
Christos Diou, Aristotle University of Thessaloniki, Greece
CongDuc Pham, University of Pau, France
Constantinos Djouvas, Cyprus University of Technology, Cyprus
Dana Petcu, West University of Timisoara, Romania
Enrique Hernández-Orallo, Universitat Politècnica de València, Spain
Eugene John, University of Texas at San Antonio, USA
Fei Hao, Shaanxi Normal University, P.R. China
Grégoire Danoy, University of Luxembourg, Luxembourg
Haibo Zhang, University of Otago, New Zealand
Houcine Hassan, Universidad Politecnica de Valencia, Spain
Igor L. Santos, CEFET, Brazil
Jason Jung, Chung-Ang University, Korea
Javid Taheri, Karlstad University, Sweden
Jiang Lu, University of Houston Clear Lake, USA
Jingtao Sun, National Institute of Informatic, Japan
Johann Marquez-Barja, University of Antwerpen, Antwerpen
Juan-Carlos Cano, Universidad Politecnica de Valencia, Spain
Klimis Ntalianis, University of West Attica, Greece
Luca Bedogni, University of Bologna, Italy
Martine Wedlake, Amazon, USA
Mauro Iacono, Università degli Studi della Campania Luigi Vanvitelli, Italy
Miaoqing Huang, University of Arkansas, USA
Paul Grace, Aston University, UK
Paulo Ferreira, University of Oslo, Norway
Paulo Pires, Federal University of Rio de Janeiro, Brazil
Ping Guo, University of Illinois at Springfield, USA
Priscilla Lima, Federal University of Rio de Janeiro, Brazil
Raphaël Couturier, University Bourgogne Franche-Comté, France
Riccardo Petrolo, Konica Minolta Laboratory Europe, Italy
Shige Wang, General Motor Global Research and Development, USA
Sotirios Chatzis, Cyprus University of Technology, Cyprus
Stefan Andrei, Lamar University, USA
Ting Yang, Tianjin University, P.R. China
Tullio Vardanega, University of Padua, Italy
Wei Zhang, Virginia Commonwealth University, USA
Yin Zhang, ZUEL, P.R. China
Yiu-Wing Leung, Hong Kong Baptist University, Hong Kong
Zenonas Theodosiou, SignalGeneriX Ltd, Limassol, Cyprus
Zhikui Chen, Dalian University of Technology, P.R. China
Organizing Committee of CBDCom 2019

Honorary Chairs
Hamido Fujita, Iwate Prefectural University, Japan
Frank Hsu, Fordam University, USA

General Chairs
Anna Kobusinska, Poznań University of Technology, Poland
Peng Li, The University of Aizu, Japan

General Executive Chairs
Bernady O. Apduhan, Kyushu Sangyo University
Paulo Pires, Federal University of Rio de Janeiro, Brazil
Rachid Benlamri, Lakehead University, Canada

Program Chairs
Shu Tao, IBM T. J. Watson Research Center, USA
Xiaoyan Wang, Ibaraki University, Japan

Track Chairs
Track 1: Big Data Science and Analytics, Burak Kantarci, University of Ottawa, Canada
Track 2: Big Data Infrastructure and Management, Hao Wang, NTNU, Norway
Track 3: Big Data Tools and Applications, Dionisis Margaris, University of Athens, Greece
Track 4: Cloud Management, Virtualization and Service, Tsozen Yeh, Fu Jen Catholic University, Taiwan
Track 5: Cloud/Big Data Security, Privacy and Trust, Haiying (Helen) Shen, University of Virginia, USA
Track 6: Cloud/Big Data for IoT and Smart City, Zhi Liu, Shizuoka University, Japan

Workshop Chairs
Yue-Shan Chang, National Taipei University, Taiwan
Shengli Pan, China University of Geoscience, China

International Liaison & Publicity Chairs
Naercio Magaia, Universidade de Lisboa, Portugal
Carlos Westphall, Federal University of Santa Catarina, Brazil
Samia Bouzefrance, CNAM, France
Michal Boroń, Poznań University of Technology, Poland
Kai Cheng, Kyushu Sangyo University, Japan

Steering Committee
Jianhua Ma, Hosei University, Japan
Laurence T. Yang, St. Francis Xavier University, Canada
Huansheng Ning, University of Science and Technology Beijing, China
Julien Bourgeois, UBFC, France
Mazin Yousif, T-Systems International, USA
Albert Zomaya, The University of Sydney, Australia

Advisory Committee
Georges Da Costa, IRIT, France
Christophe CERIN, University of Paris XIII, France
Jerry Gao, San Jose State University, USA
Andrzej Gościński, Deakin University, Australia
Carson K. Leung, University of Manitoba, Canada
Jie Li, Shanghai Jiaotong University, China
Kuan-Ching Li, Providence University, Taiwan
Fuhua Oscar Lin, Athabasca University, Canada
Yinglong Xia, Huawei Research America, USA
Weishan Zhang, China University of Petroleum, China
Hong Zhu, Oxford Brookes University, UK
Technical Program Committee of CBDCom 2019
Ugur Akyazi, TU-Delft, The Netherlands
Wenqiang Cui, Norwegian University of Science and Technology, Norway
Ilknur Donmez, Istanbul Aydin University, Turkey
Luca Foschini, University of Bologna, Italy
Yan Gao, Clarkson University, USA
Lorena González-Manzano, University Carlos II of Madrid, Spain
Biao Han, National University of Defense Technology, P.R. China
Shi-jinn Horng, National Taiwan University of Science and Technology, Taiwan
Daqing Hou, Clarkson University, USA
Chih-Wei Yi, National Chiao Tung University, Taiwan
Burak Kantarcı, University of Ottawa, Canada
Pushpendu Kar, University of Nottingham Ningbo China, P.R. China
Helen Karatzas, Aristotle University of Thessaloniki, Greece
Michihiro Koibuchi, National Institute of Informatics, Japan
Caner Komurlu, Illinois Institute of Technology, Canada
Xin Li, Nanjing University of Aeronautics and Astronautics, P.R. China
Darrell Long, University of California, Santa Cruz, USA
Xiaofei Luo, University of Aizu, Japan
Dionisis Margaris, University of Athens, Greece
Jelena Mišić, Ryerson University, Canada
Vojislav Mišić, Ryerson University, Canada
Laurent Njilla, Air Force Research Laboratory, USA
Murat Orhun, Bilgi University, Turkey
Safa Otoum, University of Ottawa, Canada
Sebnem Özdemir, Beykent University, Turkey
