The 2nd International Workshop on Adaptive Cyber Learning 2021
(ACL 2021)
Theme: “Adaptive Data-Driven Intelligence to Enable Creativity”
Online, October 25-28, 2021

The 2021 International Workshop on Adaptive Cyber Learning (ACL 2021) will be held online as part of IEEE Cyber Science and Technology Congress 2021 (www.cyber-science.org). ACL 2021 is a forum for researchers and practitioners in educational technologies to share and exchange experiences in the emerging research area of advanced cyber learning.

The main theme of ACL 2021 is “Adaptive Data-Driven Intelligence to Enable Creativity”. Cyber learning uses technology tools which actually carry out and facilitate learning experiences that would otherwise be impossible without the technology itself. Adaptive learning systems customize pedagogy and learning experiences according to the needs of a learner. Nowadays, cyber learning increasingly seeks to offer personalized learning experiences via adaptive learning.

In education, creativity is to foster learners to use knowledge, imagination, and judgment to solve problems in an innovative, high quality, and appropriate manner. So, ACL 2021 will cover various aspects of pedagogical principles, designs, ergonomics, and technological issues related the main theme. The workshop will discuss adaptive cyber learning that facilitates healthy, happy and fun learning in authentic learning environments or ecosystems with wearable devices, IOT, cloud service, AI or other advanced pedagogical and technological tools. Therefore, ACL 2021 encourages experts to develop novel and imaginative ideas to explore exciting fields of research.

TOPICS
Smart edutainment technologies
Neural science and technologies for learning
Context-based and ubiquitous learning
Social learning technologies/services
Simulation/Animation and computer vision
Cloud based technologies for learning
Virtual Reality/Augmented Reality in education
Authentic Edutainment theory and design
Pedagogical issue for interaction design

Wearable technology for learning/interaction
Affective learning
Robots for learning/interaction
Algorithms for adaptive learning
Sensor technologies for learning/interaction
Open Educational Resources
Smart learning environments
Game-based learning
Pedagogical models for collaboration
Knowledge management/Creation

MANUSCRIPT FORMAT
The Workshop paper should be 4-8 pages, following the same Paper Submission Guidelines as the main Congress papers (http://cyber-science.org/2021/).

The proceedings will be published by IEEE and best papers will be recommended for publication in special issues of leading international journals.

PAPER SUBMISSION
Submissions should represent original and substantive research results. We will not accept any paper which, at the time of submission, is under review for or has already been published (or accepted) for publication in another conference or journal. All papers will be refereed by at least two members of the program committee. Submitted papers will be carefully evaluated based on originality, significance, technical soundness, and clarity of exposition. Authors should submit their manuscripts in PDF format through https://acl2021.edas.info

If authors have any queries on submissions, please contact Dr. Ali Dewan (adewan@athabascau.ca), Dr. Wu-Yuin Hwang (wyhwang@cc.ncu.edu.tw)
