

Calgary, The World's Fourth-Most Livable City

# The 19<sup>th</sup> IEEE Int'l Conference on Dependable, Autonomic and Secure Computing (DASC 2021)

October 25-28, 2021, Calgary, Canada (Virtual Conference)

## ORGANIZING COMMITTEE

### Honorary Chairs

**Vincenzo Piuri**, *University of Milan, Italy*  
**Geoffrey Fox**, *Indiana University, USA*  
**Andrew Perrin**, *Athabasca University, Canada*

### General Chairs

**Zakirul Alam Bhuiyan**, *Fordham University, USA*  
**Rossitza Marinova**, *Concordia Univ. of Edmonton, Canada*

### General Executive Chairs

**Henry Leung**, *The University of Calgary, Canada*  
**Mohammad Zulkernine**, *Queen's University, Canada*

### Program Chairs

**Bo Yang**, *Univ. of Elec. Sci. & Tech. of China, China*  
**Aniello Castiglione**, *Univ. of Naples Parthenope, Italy*

### Program Vice-Chairs

**Lunke Fei**, *Guangdong Univ. of Technology, China*  
**Yanping Xiang**, *Univ. of Elec. Sci. & Tech. of China*  
**Muhammad Imran**, *King Saud University, KSA*

### Workshop/Special Session Chairs

**Mostafa Fouda**, *Idaho State University, USA*  
**Pradip Kumar Sharma**, *University of Aberdeen, UK*

### Demo/Poster/WiP Chair

**Saqib Ali**, *Univ. of Agri. Faisalabad Pakistan*  
**Peng Hao**, *Beihang University, China*

### Publicity Chairs

**Mubashir Rehmani**, *Cork Inst. of Tech., Ireland*  
**Haomiao Yang**, *Univ. of Elec. Sci. & Tech. of China*  
**Preeti Mishra**, *Graphic Era Deemed to be Univ., India*

### International Advisory Committee (alphabetical)

**Mohammed Atiquzzaman**, *Univ. of Oklahoma, USA*  
**Davide Bacciu**, *University of Pisa, Italy*  
**Yi Chang**, *Jilin University, China*  
**Nobuyasu Kanekawa**, *Hitachi, Ltd., Japan*  
**Sy-Yen Kuo**, *National Taiwan University, Taiwan*  
**Irwin King**, *The Chinese University of Hong Kong, China*  
**Jiming Liu**, *Hong Kong Baptist University, China*  
**Tatsuhiko Tsuchiya**, *Osaka University, Japan*  
**Wei Wang**, *University of New South Wales, Australia*  
**Ji-Rong Wen**, *Renmin University of China, China*

### Steering Committee

**Jianhua Ma** (Chair), *Hosei University, Japan*  
**Laurence T. Yang** (Chair), *St. Francis Xavier Univ., Canada*  
**Yuanshun Dai**, *Univ. of Elec. Sci. & Tech. of China*  
**Tadashi Dohi**, *Hiroshima University, Japan*  
**Md Zakirul Alam Bhuiyan**, *Fordham Univ., USA*

## IMPORTANT DATES (tentative)

**Workshop/SS Proposal Due:** **May 01, 2021**  
**Full Paper Submission Due:** **July 01, 2021**  
**Authors Notification:** **Aug. 01, 2021**  
**Camera-ready Submission:** **Sept. 01, 2021**  
**Demo/Poster/WiP Paper Due:** **Aug. 08, 2021**  
**Authors Notification:** **Sept. 06, 2021**

As computer and communication systems as well as other systems such as Cyber-Physical Systems (CPS), Internet of Things (IoT), Autonomous Robotic Systems become increasingly large and complex, their Dependability and Security play critical role at supporting next-generation science, engineering, and commercial applications. It remains a challenge to design, analyze, evaluate, and improve the dependability and security for a trusted computing environment. Trusted computing targets computing systems as well as services that are dependable, secure, protectable, predictable, traceable, controllable, autonomous, and sustainable.

At the same time, the increasing scale and complexity of systems call for the autonomic computing paradigm, which meets the requirements of self-management, and autonomous systems. Trusted and autonomic computing/autonomous systems need synergistic research efforts covering many disciplines, ranging from natural sciences to social sciences. It requires scientific and technological advances in a wide variety of fields, as well as new software, architectures, and communication technology that support the integration of the constituent technologies.

**IEEE DASC 2021** will be held in October 25-28, 2021, co-located with **IEEE CyberSciTech 2021**, **IEEE PICom 2021**, and **IEEE CBDCom 2021**. It aims to bring together computer scientists, industrial engineers, and researchers to discuss and exchange theoretical and implementation results, novel designs, work-in-progress, experience, case studies, and trend-setting ideas in the areas of dependability, security, trust and/or autonomic computing, and autonomous systems. Topics of interests include the following tracks, but are not limited to:

### Track 1. Dependable and Fault-tolerant Computing

- Fundamentals, including Dependability Evaluation, Dependable Sensors, QoS, SOA, etc.
- Dependable & Fault-tolerant Computing in Big Data, CPS, IoT, SDN, and Real-time System
- Dependability & Fault-tolerance in Cloud/Fog/Edge Computing, and Pervasive Computing
- Human Aspects, and Education
- Software Engineering in Dependable and Fault-tolerant Computing
- Artificial Intelligence Techniques in Dependable and Fault-tolerant Computing
- Hardware and Software Reliability, Verification and Testing
- Safety-critical Systems, Mission-critical Systems

### Track 2. Network and System Security and Privacy

- Fundamentals, including Intrusion-Detection, Digital Forensics, (Counter-)Surveillance, etc.
- Security and Privacy in Big Data, CPS, IoT, SDN, and Real-time Systems
- Security and Privacy in Cloud/Fog/Edge Computing, Mobile and Pervasive Computing
- Artificial Intelligence Techniques in Network and System Security and Privacy
- Human Aspects, and Education
- Cyber Attack, Crime and Cyber War
- Biometric Issues in Security and Privacy

### Track 3. Autonomic Computing and Autonomous Systems

- Fundamentals, including Agents, Real-Time Perception, Decision, Control, Self-healing, etc.
- Autonomic and Autonomous Issues in Big Data, CPS, IoT, SDN, and Real-time Systems
- Autonomic and Autonomous Issues in Cloud/Fog/Edge Computing, Pervasive Computing
- Self-Organization and Organic Computing
- Cognitive Computing and Self-Aware Computing
- Energy Management in Autonomic Computing and Autonomous Systems
- Artificial Intelligence Techniques in Autonomic Computing and Autonomous Systems
- Human Aspects, and Education

### Track 4. Industrial Applications and Emerging Techniques

- Software/Apps/Tools Development for Dependable and Secure Applications
- Autonomous Robotics, Vehicles, Machines, and Various Systems
- IoT and Sensor Network, Big Data, Smart Grid, Aerospace, Transportation Applications
- Safety Care, Medical Care and Services, IoT-based Healthcare
- Social Aspects of Applying Systems
- Other Applications and Emerging Techniques

## SUBMISSION & PUBLICATION

Authors are invited to submit their original research work using IEEE CS Proceedings format via DASC 2021 website: <http://cyber-science.org/2021/dasc/>

Regular paper (8 pages), Work-in Progress (WiP) paper (4~6 pages), Demo/Poster paper (2~4 pages), Workshop & Special Session paper (6 pages) are solicited. Detailed instructions are on the website.

- Accepted papers will be included into the proceedings published by IEEE CPS (EI indexed).
- At least one author of any accepted paper is required to register and present the paper at the conference.
- Extended versions of selected papers will be considered for fast-track publication in some prestige journals (SCI/EI indexed).
